

Hi,

ITEM 1

I have already been in contact with NSW Planning and Environment Dept, Complaints Officer, and in past the NSW OMBO who failed to do a thorough and comprehensive investigation.

I have used the Chief Scientist's Report on the Decline in the NSW koala population, with examples of how the Northern Beaches Council " conforms or FAILS ".

I am unsure of who should " DEAL " with the ITEM 1 issue as it involves a long-term mal-administration of URBAN PLANNING, to say the least.

The Chief Scientist Report on the Decline of the NSW Koala Population, has been used to identify some of the issues (non-performance) .

I may need a " CASE MANAGER" as they have them for Social Work Issues.

Putting the " issue " in as a submission to the Koala Report " review " .. is not going to help greatly. I have already spoken to the Threatened Species Unit, so they are busy with other tasks, unless extra funds are available

ITEM 2

This is different.

I think it could be sent to NSW ENVIRONMENT MINISTER, Ms Upton the former Attorney General.

But maybe its a " Whole of Govt ". responsibility (as the Bio-diversity Corridor could in future assist in Koala migration.
