

Dear Minister Upton and Office of Environment and Heritage,

I am calling on you to ensure koalas are protected into the future, so that yet another species, one of the world's favourite animal is not lost from NSW.

The key to the survival of any species is protection of its habitat. I urge you to implement stronger measures to save koala habitat. These measures would include ending native forest logging on public land, improving protection of koala habitat in private native forestry, ensuring urban development does not wipe out koala habitat and reversing the recent changes to our land-clearing protections.

Under the government's new land-clearing laws, WWF estimates we could see 2 million ha of koala habitat lost via the 'Equity Code'. The \$10 million earmarked to purchase koala habitat as part of your strategy will buy only 6,000ha of land on 2015 prices. Ten farmers applying the Equity Code could clear this in a single year.

I urge you to take meaningful action to save this beloved, iconic species.

politicians only need to look at the environmental history of the world over the last 50 years to see how easily a species can go from endangered to locally extinct.

Please use the past to influence your planning for the future.

Sincerely,

Christine Fraser
