

Dear Minister Upton and Office of Environment and Heritage,

I am calling on you to ensure koalas are protected into the future, so that the world's favourite animal is not lost from NSW.

The key to the survival of any species is protection of its habitat. I urge you to implement stronger measures to save koala habitat, including ending native forest logging on public land, improving protection of koala habitat in private native forestry, ensuring urban development does not wipe out koala habitat and reversing the recent changes to our land-clearing protections.

Under the government's new land-clearing laws, WWF estimates we could see 2 million ha of koala habitat lost via the 'Equity Code'. The \$10 million earmarked to purchase koala habitat as part of your strategy will buy only 6,000ha of land on 2015 prices. Ten farmers applying the Equity Code could clear this in a single year.

I urge you to take meaningful action to save this beloved, iconic species. The above is so blatantly true and it puts into words that I would find hard to say however biodiversity is breaking down this is obvious to me I can see the current governments here in Australia are not working for the future but for political careers and a misguided public. Listen and look at the science. Do what you are supposed to do and secure a pollutant free world. Stop land clearing and address over population.

Sincerely,

Edwin Mills
