

Dear Minister Upton and Office of Environment and Heritage,

We have lost small mammals in this country that we hardly knew were there. We have the highest mammalian extinction rate anywhere on the planet. We can't afford to put one of our most iconic and beloved mammals at further risk.

The key to the survival of any species is protection of its habitat. I urge you to implement stronger measures to save koala habitat, including ending native forest logging on public land, improving protection of koala habitat in private native forestry, ensuring urban development does not wipe out koala habitat and reversing the recent changes to our land-clearing protections.

Under the government's new land-clearing laws, WWF estimates we could see 2 million ha of koala habitat lost via the 'Equity Code'. The \$10 million earmarked to purchase koala habitat as part of your strategy will buy only 6,000ha of land on 2015 prices. Ten farmers applying the Equity Code could clear this in a single year.

I urge you to take meaningful action to save this beloved, iconic species.

Sincerely,

Tosca Looby
