

Licence Variation

Section 58(5) Protection of the Environment Operations Act 1997

AMITIE PTY LIMITED,
ACN/ARBN 060067389,
PO BOX 1586,
MURRAY BRIDGE SA 5253
STANDARD POST

Attention: Mr. BRIAN STREETS

1008028
300961

Date: 16-Oct-2001

NOTICE OF VARIATION OF LICENCE 421

Section 58 of the Protection of the Environment Operations Act 1997

BACKGROUND

- (a) AMITIE PTY LIMITED ("the licensee") is the holder of environment protection licence 421 for Scheduled Activity - Premises Based ("the licence") under the Protection of the Environment Operations Act 1997 ("the POEO Act").
- (b) The licence has been varied to amend anomalies that arose during the conversion of the licence from the Pollution Control Act format to the POEO Act format.
- (c) A Pollution Reduction Program has been added to the licence requiring the preparation of an odour reduction plan based on an odour modelling exercise.

VARIATION OF LICENCE 421

- 1) By this notice the EPA varies licence 421 as set out in the Appendix. *(for licenses with a lot of changes and where the whole licence document will be in the appendix: The Appendix is a copy of the licence marked with the variations that are made to it by this notice. (for licences with a small number of changes where only the conditions will be printed: The Appendix is a copy of the*

Licence Variation

Section 58(5) Protection of the Environment Operations Act 1997

provisions of the licence which are varied by this notice, marked with the variations that are made to them.

- 2) The variations to the licence are indicated in the following way:
 - if a strike through mark appears through any word or other text (eg. ~~Solids or~~) this indicates that the word or other text is deleted from the licence by this notice; and
 - if a double underline appears under any word or other text (eg. must be treated) this indicates that the word or other text is added to the licence by this notice.
- 3) Except, as provided by s84(2) of the POEO Act, the variations to the licence by this notice begin to operate at the expiry of the period of 21 days from when you get notice of the variations, unless another date is specified in this notice.

Note: Section 84(2) provides that a variation to a licence does not operate until

- the expiry of the period of 21 days after notice of the decision to vary the licence is given to the licensee, or
- if an appeal against the decision is lodged, until the Land and Environment Court determines the appeal, or
- the licensee notifies the EPA in writing that no appeal is to be made against the decision to vary the licence,

whichever first occurs.

(This notice is issued under section 58(5) of the Protection of the Environment Operations Act 1997.)

.....
Mr Tim Gilbert
Principal Officer Sydney Industry
Licence Conversion
(by Delegation)

INFORMATION ABOUT THIS NOTICE:

- Section 287 of the Act enables appeals to be made in connection with decisions about a licence application within 21 days after notice of the decision is given to the applicant

Information about this licence

Dictionary

The licence contains a dictionary, which defines terms used in the licence. It is found at the end of the licence.

Responsibilities of licensee

Separate to the requirements of this licence, general obligations of licensees are set out in the Protection of the Environment Operations Act 1997 ("the Act") and the Regulations made under the Act. These include obligations to:

- Ensure persons associated with you comply with this licence, as set out in section 64 of the Act.
- Control the pollution of waters and the pollution of air (see for example sections 120 - 132 of the Act).
- Report incidents causing or threatening material environmental harm to the environment, as set out in Part 5.7 of the Act.

Transfer of licence

Transfer of the licence to another person may be requested by the licensee using the form for this purpose available from the EPA.

Variation of licence conditions

Variations to the conditions of this licence may be requested by the licensee using the form for this purpose available from the EPA. The EPA may also vary a licence at any time by written notice without an application being made.

Where a licence has been granted in relation to development which was assessed under the Environmental Planning and Assessment Act 1979 in accordance with the procedures applying to integrated development, the EPA may not impose conditions which are inconsistent with the development consent conditions until the licence is first reviewed under Part 3.6 of the Act.

Duration of licence

This licence will remain in force until the licence is surrendered by the licence holder or until it is suspended or revoked by the EPA or the Minister. A licence may only be surrendered with the written approval of the EPA.

Licence review

The Act requires that the EPA review your licence at least every 3 years after the issue of the licence, as

set out in Part 3.6 of the Act. You will receive advance notice of the licence review. For licences held immediately before 1 July 1999, the first review will take place before 1 July 2002.

Fees and annual return to be sent to the EPA

The licence requires you to forward to the EPA an Annual Return, comprising a Statement of Compliance and a summary of any monitoring required by the licence (including the recording of complaints).

The Annual Return must be submitted within 60 days after the end of each reporting period. Where a licence is transferred, surrendered or revoked, a special reporting period applies.

For each licence fee period you must pay:

- an administrative fee; and
- a load-based fee (if applicable).

Usually the licence fee period is the same as the reporting period.

See condition R1 and the accompanying form regarding the Annual Return requirements.

The EPA publication "A Guide to Licensing" contains information about how to calculate your licence fees.

Public register and access to monitoring data

Part 9.5 of the Act requires the EPA to keep a public register of details and decisions of the EPA in relation to, for example:

- licence applications
- licence conditions and variations
- statements of compliance

Under s320 of the Act application can be made to the EPA for access to monitoring data which has been submitted to the EPA by licensees.

Licence anniversary date

01-October

This licence is issued to

AMITIE PTY LIMITED
P.O. BOX 1586
MURRAY BRIDGE SA 5253

subject to the conditions which follow:

1 Administrative conditions

A1 What the licence authorises and regulates

A1.1 Not applicable.

A1.2 This licence authorises the carrying out of the scheduled activities listed below at the premises specified in A2. The activities are listed according to their scheduled activity classification, fee-based activity classification and the scale of the operation.

Unless otherwise further restricted by a condition of this licence, the scale at which the activity is carried out must not exceed the maximum scale specified in this condition.

Scheduled Activity
Livestock Intensive Industries - pig

Fee Based Activity	Scale
Pig Production (42)	> 250 - 500 T accommodated

A1.3 Not applicable.

A2 Premises to which this licence applies

A2.1 The licence applies to the following premises:

Premises Details
HILLCREST PARK PIGGERY
610 MORETON PARK ROAD
MENANGLE
NSW
2568
DP 249189/248225/550689 LOT 1 DP550689, LOT2
DP248225 & LOT 105 DP249189

Premises Details

A3 Other activities

A3.1 Not applicable.

A4 Information supplied to the EPA

A4.1 Works and activities must be carried out in accordance with the proposal contained in the licence application, except as expressly provided by a condition of this licence.

In this condition the reference to "the licence application" includes a reference to:

- (a) the applications for any licences (including former pollution control approvals) which this licence replaces under the Protection of the Environment Operations (Savings and Transitional) Regulation 1998 and
- (b) the licence information form provided by the licensee to the EPA to assist the EPA in connection with the issuing of this licence.

2 Discharges to air and water and applications to land

P1 Location of monitoring/discharge points and areas

P1.1 Not applicable.

P1.2 The following points referred to in the table are identified in this licence for the purposes of the monitoring and/or the setting of limits for discharges of pollutants to water from the point.

P1.3 The following utilisation areas referred to in the table below are identified in this licence for the purposes of the monitoring and/or the setting of limits for any application of solids or liquids to the utilisation area.

Water and land

EPA identification no.	Type of monitoring point	Type of discharge point	Description of location
1	Effluent Pump House - Lot 105 DP 249189 Effluent quality and volume monitoring	Effluent Pump House - Lot 105 DP 249189	Outlet from the effluent pump located in the pump house at the northern end of Lot 105 DP 249189 as shown in the drawing titled "Layout of Hillcrest Park Piggery, Moreton Park Road, Menangle NSW" dated November 1988.
2	Surface soils monitoring of utilisation areas		Effluent utilisation areas as shown in the drawing titled "Layout of Hillcrest Park Piggery, Moreton Park Road, Menangle NSW" dated November 1988.
3	Subsurface soils monitoring of utilisation areas		Effluent utilisation areas as shown on the drawing titled "Layout of Hillcrest Park Piggery, Moreton Park Road, Menangle NSW" dated November 1988.
4		Discharge to utilisation areas	Effluent utilisation areas shown on drawing titled "Layout of Hillcrest Park Piggery, Moreton Park Road, Menangle NSW" dated November 1988.

3 Limit conditions

L1 Pollution of waters

L1.1 Except as may be expressly provided in any other condition of this licence, the licensee must comply with section 120 of the Protection of the Environment Operations Act 1997.

L2 Load limits

L2.1 Not applicable.

L2.2 Not applicable.

L3 Concentration limits

L3.1 Not applicable.

L3.2 Not applicable.

L3.3 Not applicable.

L4 Volume and mass limits

L4.1 For each discharge point or utilisation area specified below (by a point number), the volume/mass of:

- (a) liquids discharged to water; or;
- (b) solids or liquids applied to the area;

must not exceed the volume/mass limit specified for that discharge point or area.

Point	Unit of measure	Volume/Mass Limit
11	KL/day	300

L5 Waste

L5.1 Not applicable.

L6 Noise Limits

L6.1 Not applicable.

4 Operating conditions

O1 Activities must be carried out in a competent manner

O1.1 Licensed activities must be carried out in a competent manner.

This includes:

- (a) the processing, handling, movement and storage of materials and substances used to carry out the activity; and
- (b) the treatment, storage, processing, reprocessing, transport and disposal of waste generated by the activity.

O2 Maintenance of plant and equipment

O2.1 All plant and equipment installed at the premises or used in connection with the licensed activity:

- (a) must be maintained in a proper and efficient condition; and
- (b) must be operated in a proper and efficient manner.

~~O3 Site Specific Operating Conditions~~

~~O3.1 All wasted bedding material, sludge, screened solids and pig manure must be stored in an impervious bunded area~~

~~O3.2 There must be no discharge of wastewater to any watercourse or to any area other than the defined wastewater disposal area.~~

O3 Effluent Utilisation Area Management

~~O3.31 Irrigation of wastewater must not be carried out within 50 metres of any water course if soil moisture conditions are such that surface runoff or ponding is likely to occur.~~

~~O3.4 Irrigation of wastewater must not be carried out if soil moisture conditions are such that surface runoff or ponding is likely to occur~~

~~O3.52 The irrigation area must be maintained in a proper and efficient condition so as to provide adequate percolation, evaporation and transpiration of the effluent.~~

~~O3.6 The volume of wastewater directed to the 3 Spray from irrigation area must not exceed the capacity of the area to assimilate the wastewater effluent must not drift into residential or public areas and/or watercourses.~~

~~O3.4 Straw and dry litter used in the dry (deep litter) pig sheds must be maintained in a dry condition.~~

~~O3.7 Spray from irrigation effluent must not drift into residential or public areas and/or watercourses.~~

~~O3.5 The straw in the dry (deep litter) pig sheds must be maintained at a depth of 300 mm at all times.~~

~~O3.6 All wasted bedding material, sludge, screened solids and pig manure must be stored in an impervious, bunded area.~~

5 Monitoring and recording conditions

M1 Monitoring records

M1.1 The results of any monitoring required to be conducted by this licence or a load calculation protocol must be recorded and retained as set out in this condition.

M1.2 All records required to be kept by this licence must be:

- (a) in a legible form, or in a form that can readily be reduced to a legible form;
- (b) kept for at least 4 years after the monitoring or event to which they relate took place; and
- (c) produced in a legible form to any authorised officer of the EPA who asks to see them.

M1.3 The following records must be kept in respect of any samples required to be collected for the purposes of this licence:

- (a) the date(s) on which the sample was taken;
- (b) the time(s) at which the sample was collected;
- (c) the point at which the sample was taken; and
- (d) the name of the person who collected the sample.

M2 Requirement to monitor concentration of pollutants discharged

M2.1 For each monitoring/discharge point or utilisation area specified below (by a point number), the licensee must monitor (by sampling and obtaining results by analysis) the concentration of each pollutant specified in Column 1. The licensee must use the sampling method, units of measure, and sample at the frequency, specified opposite in the other columns:

Water and Land

POINT 1

Pollutant	Units of measure	Frequency	Sampling Method
BOD	mg/L	Quarterly	Grab sample
Calcium	mg/L	Quarterly	Grab sample
Conductivity	mS/cm	Quarterly	Probe
Faecal coliforms	As approp. mg/L	Quarterly	Grab sample
Copper	mg/L	Yearly	Grab sample
Faecal coliforms	cfu/100ml	Quarterly	Grab sample
Magnesium	mg/L	Quarterly	Grab sample
Nitrate + nitrite (oxidised nitrogen)	mg/L	Quarterly	Grab sample
Nitrogen	mg/L	Quarterly	Grab sample
Nitrogen as ammonia	mg/L	Quarterly	Grab sample
Potassium	mg/L	Quarterly	Grab sample
Sodium	mg/L	Quarterly	Grab sample
Total Kjeldahl Nitrogen	mg/L	Quarterly	Grab sample
Total Nitrogen	mg/L	Quarterly	Grab sample
Total Phosphorus	mg/L	Quarterly	Grab sample

POINT 2

Pollutant	Units of measure	Frequency	Sampling Method
Bray Phosphorous	mg/kg	Yearly	Special Method 1
Conductivity	mS/cm	Yearly	Special Method 1
Exchangeable Calcium	mg/kg	Yearly	Special Method 1
Exchangeable magnesium	mg/kg	Yearly	Special Method 1
Exchangeable potassium	mg/kg	Yearly	Special Method 1
Exchangeable sodium	mg/kg	Yearly	Special Method 1
Nitrate	mg/kg	Yearly	Special Method 1
Nitrogen as ammonia	mg/kg	Yearly	Special Method 1
Total Kjeldahl Nitrogen	mg/kg	Yearly	Special Method 1
Total copper	mg/kg	Yearly	Special Method 1
pH	pH	Yearly	Special Method 1

POINT 3

Pollutant	Units of measure	Frequency	Sampling Method
Bray Phosphorous	mg/kg	Yearly	Special Method 2
Conductivity	mS/cm	Yearly	Special Method 2
Nitrate	mg/kg	Yearly	Special Method 2
Total copper	mg/kg	Yearly	Special Method 2
pH	pH	Yearly	Special Method 2

M2.2 For the purpose of condition M2.1, Special Method 1 is defined as three composite soil samples collected from the surface soils (0-15cm depth). Each composite soil sample must be analysed for the parameters set out in condition M2.1 and each composite must also comprise of 20 subsamples. One composite sample must be collected from each of the following profiles in the irrigation area:

- (a) slope;
- (b) ridge; and
- (c) flat area.

M2.3 For the purpose of condition M2.1, Special Method 2 is defined as three composite soil samples collected from the subsurface soils (45-75cm), each composite soil sample must be analysed for the parameters set out in condition M2.1 and each composite sample must also comprise of 20 subsamples. One composite sample must be collected from each of the following profiles in the irrigation area:

- (a) slope;
- (b) ridge; and
- (c) flat area.

M3 Testing methods - concentration limits

M3.1 Not applicable.

M3.2 Subject to any express provision to the contrary in this licence, monitoring for the concentration of a pollutant discharged to waters or applied to a utilisation area must be done in accordance with the Approved Methods Publication unless another method has been approved by the EPA in writing before any tests are conducted.

M4 Recording of pollution complaints

M4.1 The licensee must keep a legible record of all complaints made to the licensee or any employee or agent of the licensee in relation to pollution arising from any activity to which this licence applies.

M4.2 The record must include details of the following:

- (a) the date and time of the complaint;
- (b) the method by which the complaint was made;
- (c) any personal details of the complainant which were provided by the complainant or, if no such details were provided, a note to that effect;
- (d) the nature of the complaint;

- (e) the action taken by the licensee in relation to the complaint, including any follow-up contact with the complainant; and
- (f) if no action was taken by the licensee, the reasons why no action was taken.

M4.3 The record of a complaint must be kept for at least 4 years after the complaint was made.

M4.4 The record must be produced to any authorised officer of the EPA who asks to see them.

M5 Telephone complaints line

M5.1 The licensee must operate during its operating hours a telephone complaints line for the purpose of receiving any complaints from members of the public in relation to activities conducted at the premises or by the vehicle or mobile plant, unless otherwise specified in the licence.

M5.2 The licensee must notify the public of the complaints line telephone number and the fact that it is a complaints line so that the impacted community knows how to make a complaint.

M5.3 Conditions M5.1 and M5.2 do not apply until 3 months after:

- (a) the date of the issue of this licence or
- (b) if this licence is a replacement licence within the meaning of the Protection of the Environment Operations (Savings and Transitional) Regulation 1998, the date on which a copy of the licence was served on the licensee under clause 10 of that regulation.

M6 Requirement to monitor volume or mass

~~M6.1 Not applicable.~~

~~M6.1 For each discharge point or utilisation area specified below, the licensee must monitor:~~

- ~~(a) the volume of liquids discharged to water or applied to the area;~~
- ~~(b) the mass of solids applied to the area;~~
- ~~(c) the mass of pollutants emitted to the air;~~

~~at the frequency and using the method and units of measure, specified below.~~

~~POINT 1~~

Frequency	Unit Of Measure	Sampling Method
Daily	kL/day	By Calculation (volume flow rate or pump capacity multiplied by operating time)

6 Reporting conditions

R1 Annual return documents

What documents must an Annual Return contain?

R1.1 The licensee must complete and supply to the EPA an Annual Return in the approved form comprising:

- (a) a Statement of Compliance; and
- (b) a Monitoring and Complaints Summary.

A copy of the form in which the Annual Return must be supplied to the EPA accompanies this licence. Before the end of each reporting period, the EPA will provide to the licensee a copy of the form that must be completed and returned to the EPA.

Period covered by Annual Return

R1.2 An Annual Return must be prepared in respect of each reporting period, except as provided below.

Note: The term "reporting period" is defined in the dictionary at the end of this licence. Do not complete the Annual Return until after the end of the reporting period.

R1.3 Where this licence is transferred from the licensee to a new licensee,

- (a) the transferring licensee must prepare an Annual Return for the period commencing on the first day of the reporting period and ending on the date the application for the transfer of the licence to the new licensee is granted; and
- (b) the new licensee must prepare an Annual Return for the period commencing on the date the application for the transfer of the licence is granted and ending on the last day of the reporting period.

Note: An application to transfer a licence must be made in the approved form for this purpose.

R1.4 Where this licence is surrendered by the licensee or revoked by the EPA or Minister, the licensee must prepare an Annual Return in respect of the period commencing on the first day of the reporting period and ending on

- (a) in relation to the surrender of a licence - the date when notice in writing of approval of the surrender is given; or
- (b) in relation to the revocation of the licence - the date from which notice revoking the licence operates.

Deadline for Annual Return

R1.5 The Annual Return for the reporting period must be supplied to the EPA by registered post not later than 60 days after the end of each reporting period or in the case of a transferring licence not later than 60 days after the date the transfer was granted (the 'due date').

Notification where actual load can not be calculated

R1.6 Not applicable.

Licensee must retain copy of Annual Return

R1.7 The licensee must retain a copy of the Annual Return supplied to the EPA for a period of at least 4 years after the Annual Return was due to be supplied to the EPA.

Certifying of Statement of Compliance and Signing of Monitoring and Complaints Summary

- R1.8 Within the Annual Return, the Statement of Compliance must be certified and the Monitoring and Complaints Summary must be signed by:
- (a) the licence holder; or
 - (b) by a person approved in writing by the EPA to sign on behalf of the licence holder.
- R1.9 A person who has been given written approval to certify a certificate of compliance under a licence issued under the Pollution Control Act 1970 is taken to be approved for the purpose of this condition until the date of first review of this licence.

R2 Notification of environmental harm

Note: The licensee or its employees must notify the EPA of incidents causing or threatening material harm to the environment as soon as practicable after the person becomes aware of the incident in accordance with the requirements of Part 5.7 of the Act.

- R2.1 Notifications must be made by telephoning the EPA's Pollution Line service on 131 555.
- R2.2 The licensee must provide written details of the notification to the EPA within 7 days of the date on which the incident occurred.

R3 Written report

- R3.1 Where an authorised officer of the EPA suspects on reasonable grounds that:
- (a) where this licence applies to premises, an event has occurred at the premises; or
 - (b) where this licence applies to vehicles or mobile plant, an event has occurred in connection with the carrying out of the activities authorised by this licence,
- and the event has caused, is causing or is likely to cause material harm to the environment (whether the harm occurs on or off premises to which the licence applies), the authorised officer may request a written report of the event.
- R3.2 The licensee must make all reasonable inquiries in relation to the event and supply the report to the EPA within such time as may be specified in the request.
- R3.3 The request may require a report which includes any or all of the following information:
- (a) the cause, time and duration of the event;
 - (b) the type, volume and concentration of every pollutant discharged as a result of the event;
 - (c) the name, address and business hours telephone number of employees or agents of the licensee, or a specified class of them, who witnessed the event; and
 - (d) the name, address and business hours telephone number of every other person (of whom the licensee is aware) who witnessed the event, unless the licensee has been unable to obtain that information after making reasonable effort;
 - (e) action taken by the licensee in relation to the event, including any follow-up contact with any complainants;
 - (f) details of any measure taken or proposed to be taken to prevent or mitigate against a recurrence of such an event;
 - (g) any other relevant matters.
- R3.4 The EPA may make a written request for further details in relation to any of the above matters if it

is not satisfied with the report provided by the licensee. The licensee must provide such further details to the EPA within the time specified in the request.

General conditions

G1 Copy of licence kept at the premises

- G1.1 A copy of this licence must be kept at the premises to which the licence applies.
- G1.2 The licence must be produced to any authorised officer of the EPA who asks to see it.
- G1.3 The licence must be available for inspection by any employee or agent of the licensee working at the premises.

Pollution studies and reduction programs

Objective:

To prepare an odour reduction plan that ensures odour emissions from the premises meet odour performance criterion detailed in:

- a) NSW EPA, 2001, *Draft Policy: Assessment and Management of Odour from Stationary Sources in NSW, January 2001*;
- b) NSW EPA, 2001, *Technical Note, Draft Policy: Assessment and Management of Odour from Stationary Sources in NSW, January 2001*;
- c) NSW EPA, 2001, *Approved Methods and Guidance for the Modelling and Assessment of Air Pollutants in New South Wales*.

U1.1. By 31 January 2002 the licensee must submit to the EPA's Manager Sydney Industry an odour impact assessment and mitigation report.

U1.2. The report required by item U1.1 must be based on odour impact assessment undertaken in accordance with the methodologies contained in the following documents:

- a) NSW EPA, 2001, *Draft Policy: Assessment and Management of Odour from Stationary Sources in NSW, January 2001*;
- b) NSW EPA, 2001, *Technical Note, Draft Policy: Assessment and Management of Odour from Stationary Sources in NSW, January 2001*;
- c) NSW EPA, 1999, *Approved Methods for the Sampling and Analysis of Air Pollutants in NSW, December 1999*; and
- d) NSW EPA, 2001, *Approved Methods and Guidance for the Modelling and Assessment of Air Pollutants in New South Wales*.

U1.3. The report required by item U1.1 must include:

- a) a list of all significant odour sources at the premises;

- b) results of sampling and emission concentrations/rates for each significant odour source at the premises, determined in accordance with methods detailed in documents listed in item U1.2;
- c) an impact assessment of each significant odour source at the premises, undertaken:
 - i) in accordance with methods specified in documents listed at item U1.2; and
 - ii) using data collected in accordance with item U1.3b);
- d) a comparison of the results of the impact assessments from item U1.3c), with relevant odour performance criterion detailed in documents listed at items U1.2 ('relevant criterion');
- e) a technical review of all practicable odour mitigation options and quantitative assessment of potential odour reduction for each option, for any significant odour source identified as a result of item U1.3d) as causing or likely to cause an exceedance of relevant criterion;
- f) a recommendation for an odour reduction plan that includes practicable measures for mitigating point and diffuse odour sources, designed to achieve an objective of ensuring odour emissions from the premises meet the relevant criterion. The recommendation must be supported by odour modelling (including taking into account factors such as worst case weather conditions, topography and proximity of sensitive receptors to the modelled affected zone);
- g) where odour modelling reveals that the odour reduction plan will not meet relevant criterion:
 - i) a quantitative assessment of the residual impact that will remain above the relevant criterion after the implementation of the odour reduction plan;
 - ii) the measures for managing the residual impacts; and
 - iii) an on-going research program to continually investigate emerging best practice to address the residual impact in the longer term.

U1.4. By 31 January 2002 the licensee must either:

- a) install a meteorological station at the premises which can be used in verifying reports of odour emissions from the premises and for odour impact assessment purposes; or
- b) satisfy the EPA that the licensee is able to access data from an existing meteorological station that provides data representative of the premises which can be used in verifying reports of odour emissions from the premises and for odour impact assessment purposes, and which is operated and maintained in accordance with the methods detailed in documents listed in item U1.2.

Special conditions

E1.1 By 14 September 2000 the licensee must: E0.1 Not applicable.

remove all wet bedding material from all the dry (deep litter) pig sheds;
remove all wet bedding material referred to in (i) above from the premises to a place of lawful disposal on the same day as the material is removed from the pig sheds;
place dry hay or straw in all operational dry (deep litter) pig sheds to a minimum depth of 300 millimetres and thereafter maintain the hay or straw in all operational dry (deep litter) pig sheds:

- a) in a dry condition; and
- b) at a minimum depth of 300 mm.

E1.2 By 14 September 2000 the licensee must repair all operational dry (deep litter) pig sheds, including the storm/draught curtains and roofing structures, to prevent the ingress of rainwater into the

operational dry (deep litter) pig sheds and thereafter maintain all operational dry (deep litter) pig sheds in a condition which prevents the ingress of stormwater.

E1.3 By 9 October 2000 the licensee must remove from the premises all wasted bedding material, sludge, screened solids and pig manure that is stockpiled outside an impervious, bunded area.

Dictionary

General Dictionary

In this licence, unless the contrary is indicated, the terms below have the following meanings:

3DGM [in relation to a concentration limit]	Means the three day geometric mean, which is calculated by multiplying the results of the analysis of three samples collected on consecutive days and then taking the cubed root of that amount. Where one or more of the samples is zero or below the detection limit for the analysis, then 1 or the detection limit respectively should be used in place of those samples
Act	Means the Protection of the Environment Operations Act 1997
activity	Means a scheduled or non-scheduled activity within the meaning of the Protection of the Environment Operations Act 1997
actual load	Has the same meaning as in the Protection of the Environment Operations (General) Regulation 1998
AMG	Australian Map Grid
anniversary date	The anniversary date is the anniversary each year of the date of issue of the licence. In the case of a licence continued in force by the Protection of the Environment Operations Act 1997, the date of issue of the licence is the first anniversary of the date of issue or last renewal of the licence following the commencement of the Act.
annual return	Is defined in R1.1
Approved Methods Publication	Has the same meaning as in the Protection of the Environment Operations (General) Regulation 1998
assessable pollutants	Has the same meaning as in the Protection of the Environment Operations (General) Regulation 1998
BOD	Means biochemical oxygen demand
COD	Means chemical oxygen demand
composite sample	Unless otherwise specifically approved in writing by the EPA, a sample consisting of 24 individual samples collected at hourly intervals and each having an equivalent volume.
cond.	Means conductivity
environment	Has the same meaning as in the Protection of the Environment Operations Act 1997
environment protection legislation	Has the same meaning as in the Protection of the Environment Administration Act 1991
EPA	Means Environment Protection Authority of New South Wales.
fee-based activity classification	Means the numbered short descriptions in Schedule 1 of the Protection of the Environment Operations (General) Regulation 1998.
flow weighted composite sample	Means a sample whose composites are sized in proportion to the flow at each composites time of collection.

grab sample	Means a single sample taken at a point at a single time
hazardous waste	Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997
industrial waste	Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997
inert waste	Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997
licensee	Means the licence holder described at the front of this licence
load calculation protocol	Has the same meaning as in the Protection of the Environment Operations (General) Regulation 1998
local authority	Has the same meaning as in the Protection of the Environment Operations Act 1997
material harm	Has the same meaning as in section 147 Protection of the Environment Operations Act 1997
MBAS	Means methylene blue active substances
Minister	Means the Minister administering the Protection of the Environment Operations Act 1997
mobile plant	Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997
motor vehicle	Has the same meaning as in the Protection of the Environment Operations Act 1997
O&G	Means oil and grease
percentile [in relation to a concentration limit of a sample]	Means that percentage [eg.50%] of the number of samples taken that must meet the concentration limit specified in the licence for that pollutant over a specified period of time. In this licence, the specified period of time is the Reporting Period unless otherwise stated in this licence.
plant	Includes all plant within the meaning of the Protection of the Environment Operations Act 1997 as well as motor vehicles.
pollution of waters [or water pollution]	Has the same meaning as in the Protection of the Environment Operations Act 1997
premises	Means the premises described in condition A2.1
public authority	Has the same meaning as in the Protection of the Environment Operations Act 1997
regional office	Means the relevant EPA office referred to in the Contacting the EPA document accompanying this licence
reporting period	For the purposes of this licence, the reporting period means the period of 12 months after the issue of the licence, and each subsequent period of 12 months. In the case of a licence continued in force by the Protection of the Environment Operations Act 1997, the date of issue of the licence is the first anniversary of the date of issue or last renewal of the licence following the commencement of the Act.
reprocessing of waste	Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997
scheduled activity	Means an activity listed in Schedule 1 of the Protection of the Environment Operations Act 1997
solid waste	Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997
treatment of waste	Has the same meaning as in Part 3 of Schedule 1 of the Protection of the Environment Operations Act 1997
TSP	Means total suspended particles

TSS	Means total suspended solids
utilisation area	Means any area shown as a utilisation area on a map submitted with the application for this licence
waste	Has the same meaning as in the Protection of the Environment Operations Act 1997
waste code	Means the waste codes listed in Appendix 5 of the EPA document A Guide to Licensing Part B.
waste type	Means Group A, Group B, Group C, inert, solid, industrial or hazardous waste

Mr David Cook

Head Regional Operations Unit Murray

(By Delegation)

Date of this edition - 23-May-2001

End Notes

- 1 Licence varied by notice V/M upgrade, issued on 08-Jul-2000, which came into effect on 08-Jul-2000.
- 2 Licence varied by 1001365 (ISEMS) s.58 notice, issued on 23-Mar-2000, which came into effect on 17-Apr-2000.
- 3 Licence varied by 010989 (ALaN) s.58 notice, issued on 15-Sep-2000, which came into effect on 10-Oct-2000.
