action matters **for business**

Energy efficiency
for your business

We've helped thousands of businesses across New South Wales reduce their energy use, saving them money and improving their competitiveness.
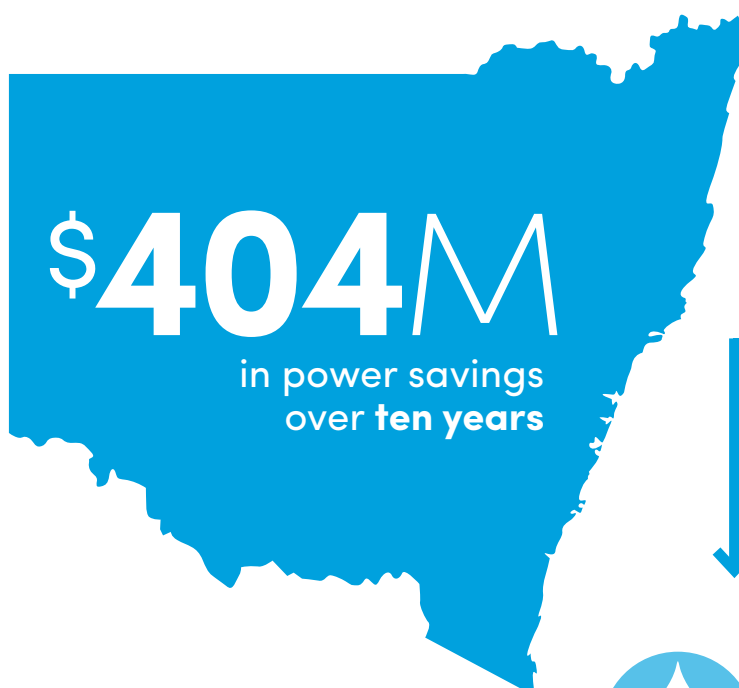

18,000+
Energy assessments

19,500+
Completed energy projects

16,000
Business professionals trained

Over
$113M
Invested by NSW businesses

WHAT HAVE THEY SAVED?

$404M
in power savings over **ten years**

170,000
MWh of electricity a year

This is similar to taking

26,000 houses off the grid

Or a city the size of Wagga Wagga off the grid

More than
210,000GJ
of gas annually

In the process, these businesses have gained productivity benefits such as improved staff wellbeing, more efficient production processes, reduced machinery downtime, and deferred need for new machinery.

But don't take our word for it. Hear from some of our businesses on **YouTube** >
