Battery storage for business

Learn how to evaluate the benefits of battery storage systems in your business

Battery storage is the subject of a substantial amount of hype and market interest. How can it be of value to your business?

Battery storage for business training will arm you with knowledge, skills and tools for integrating battery storage systems into your organisation.

What will you learn to do?

- Understand how battery storage systems work
- Perform a risk and mitigation analysis
- Review your electrical system, usage and define your objectives and targets
- Use tools to review the cost modelling for battery storage and establish what variables may affect viability at your site.

Up to
\$3000 worth
of post-training
support available
for only **\$300***

Course benefits

- Review the technology without the influence of brand marketing and sales hype
- Assess the feasibility of battery storage and when financial return targets would be met
- Define next steps to go to market to obtain quotes from installers and suppliers.

Who should attend?

Business, facility and sustainability managers of all levels are encouraged to attend. But a basic knowledge of energy is assumed (e.g. how to read a commercial energy bill). We encourage businesses to have explored energy efficiency upgrades prior to attending this course.

Course structure

OEH courses are run by industry experts – providing coaching, support and an interactive learning experience. The course consists of two half-day workshops.

Workshop one (half-day):

- Learn about battery storage technology
- Potential benefits
- Risk identification and mitigation
- Tools and resources, how to scope your projects.

Workshop two (half-day):

- Review your site with the trainer
- Workshop your project and define next steps
- Evaluating market offers & engaging suppliers
- What happens next.

Subsidised course fee (for both workshops): \$400 per person in Sydney and \$200 per person in regional NSW*.

Post-training support

Unique to OEH energy efficiency training courses, post-training support is available for eligible participants and provides one-on-one expert guidance to help you implement your energy efficiency opportunities and achieve tangible outcomes for your organisation. Participants can access **up to \$3000 worth of support for only \$300***.

Examples of this one-on-one guidance include:

- Evaluation of proposals from suppliers and or installers
- Assistance with negotiation and technical support during negotiation with potential supplier / installers
- Technical support during installation phase and commissioning.

Limited time only: Post-training support is available, on application, for only six months following attendance at a training course.

** Offer subject to change without notice*

Custom training: We also offer customised in-house training. If you have a group of 10 or more, we can tailor the training to your needs, and conduct the workshops at your place of business.

Locations and dates

Visit www.environment.nsw.gov.au/training to see current dates and locations and to book now.

If there isn't a suitable session, please register your interest online in attending on a future date.

About OEH energy efficiency training programs

Since 2009, OEH has trained more than 16,000 business professionals from some of Australia's most successful companies. Our courses are designed to give NSW businesses a competitive advantage by increasing energy efficiency and energy productivity. Attendees gain the skills, knowledge and insights to implement effective energy management and best practices in their own workplace. All training courses are practical, collaborative and 'hands-on', with a clear focus on increasing energy efficiency and reducing cost.
