Old Bar
Erosion Protection Works
Proposed erosion protection works within property boundaries.
Upon completion, sand to be placed over structure to ensure ingress of sand into geotextile

2.5m³ sand filled containers (See note)

Geotextile (See note)

2.5m³ sand filled containers with scour flap (Container may rotate to reduce the effects of the structure undermining)

Upon completion, thin layer of sand to be placed over structure to ensure ingress of sand into geotextile

Geotextile (See note)

2.5m³ sand filled containers with scour flap (Container may rotate to reduce the effects of the structure undermining)
