Dear business owner/operator,

Waverley Council has been funded by the New South Wales Government through its Stormwater Trust to explore approaches to enhanced stormwater management in Bronte Catchment through local community participation.

This project is an Australian first in environmental management. Previous programs have concentrated on collecting rubbish and educating people about minimising pollution. This is an innovative project because it focuses on community participation.

We are working in the area from Carrington Road down to Bronte Beach, and from MacPherson Street across Birrell Street. This is the Bronte catchment. When it rains, this area is drained by natural water courses and the stormwater system. All the stormwater in this catchment drains to Bronte Beach.

The Bronte community includes residents, people who regularly visit Bronte, local businesses, community groups and Waverley Council. As part of the community, we are asking you what you think the main environmental issues in the area are and how the community can get involved to address these issues.

We urge you to become involved in this project. Your participation will help your business build better community relationships and this equals better business.

We look forward to your involvement.

Yours sincerely,

Roberta Ryan for the Bronte Project Team
