Business Interview Schedule

The businesses interviews were informal and conversational, following a semi-structured schedule which covered the following issues:

- Main environmental/stormwater issues in the Bronte Catchment
- How the business perceives its role in the management of these issues?
- What (if any) is the most effective method of involving business in the management of stormwater?
- How does the business perceive Waverley Council in terms of its responsibility for the management of stormwater in Bronte Catchment?
- Who does business perceive to be the ‘community’ of interest in the management of stormwater?
