

Cooks River Environmental Assessment & Education Project

and

working together to

“Bring the Cooks River to Life”

We keep the stormwater drains around our premises free of pollutants. We know these drains lead straight to the Cooks River and Botany Bay.

We keep our workplace tidy to prevent pollution of the air, ground and stormwater.

We separate our wastes, recycle when we can and reuse or return excess packaging to suppliers to reduce our waste to landfill.

We keep material to clean up spills in an accessible place.

We use our energy and water resources efficiently because we know it's good for the environment and profitability
