

NSW Threatened Species Scientific Committee

Index to Final Determinations – 1996 –2017

(Updated to 25/08/2017)

Listing of threatened species, populations and ecological communities in NSW from 1996 to 25th August 2017 was undertaken by the NSW Scientific Committee established under the *Threatened Species Conservation Act, 1995*. The extinction risk of species, populations and ecological communities were assessed at the State scale under this Act. However, it should be noted that assessments of species endemic to NSW (ie species that only occur in NSW) is equivalent to a national scale assessment.

The NSW Threatened Species Scientific Committee (NSWTSSC) is established under the Biodiversity Conservation Act, 2016 which commenced on 25th August 2017. Under this Act, species and ecological communities are assessed at the national scale. If a species or ecological community is not threatened at the national scale then it can be assessed at the State scale and can be listed as threatened if it meets the criteria for listing in NSW.

The NSWTSSC identifies and assesses species and ecological communities for listing as threatened in the Schedules of the Act as follows:

- Schedule 1 – Critically endangered (CR), Endangered (E) and Vulnerable (V) species
- Schedule 2 – Critically endangered (CREEC), Endangered (EEC) and Vulnerable (VEC) ecological communities
- Schedule 3 – Extinct species (EX), species extinct in the wild and collapsed ecological communities
- Schedule 4 – Key threatening processes (KTP)

Final determinations include the reasons for listing and are available for those entities listed or reviewed by the Committee since the *Threatened Species Conservation Act, 1995* commenced in 1996. Final determinations made prior to 25th August 2017 refer to the listing criteria and provisions of the Threatened Species Conservation Act and Regulations. Final Determinations made since 25th August 2017 refer to the listing criteria and provisions of the Biodiversity Conservation Act and Regulations.

Species that were listed in the Schedules at the commencement of the Threatened Species Conservation Act and have not been subsequently reviewed do not have a Final determination. Provisional listings (PL) on an emergency basis are also included in this list until they are superseded by a Final determination.

NSW Threatened Species Scientific Committee

The Committee may also make a Minor Amendment (MA) Determination (under Section 36a of the TSC Act and Section 4.19 of the BC Act) to correct minor errors or omissions or to make changes to species names as a result of taxonomic revision. Minor Amendment Determinations may relate to one or two species, eg Giant Dragonfly (taxonomic split), and these Determinations have been included in the Index. Other section Minor Amendment Determinations which make changes to a large number of species are not included in the Index. These Determinations may be viewed on the website at:

<http://www.environment.nsw.gov.au/committee/schedulesthreatenedspeciesconservationact.htm>

Some Determinations have been identified in the index for transfer to an Archive Determination page which is yet to be created. Some early Determinations have already been removed from the website while later Determinations may still be available. After checking the website, please contact the NSW TSSC on 02 9585 6940 or email scientific.committee@environment.nsw.gov.au if you wish to access a Determination that is not on the website.

A year marked with an asterisk (*) in the index shows the year the species was added to the Schedules following a provisional listing on an emergency basis. The later year is when the listing was confirmed with a Final Determination.

⁺Year - Please note that the "Year" column shows the year a Final Determination was made for the listing of the species etc. at the status shown. It should not be assumed that this is the year the species was added to the Schedules. A number of species that were already listed have been either upgraded or downgraded within the Schedules. Please read the Final Determination to check if it is a newly listed species or a change in status of an already listed species.

Key Threatening Processes

Common Name (where appropriate) or Scientific name	Year	Determination Type	Status
1080 poison baiting used for the control of vertebrate pest animals	2008	FD	0-reject
Aggressive exclusion of birds from woodland and forest habitat by abundant Noisy Miners <i>Manorina melanocephala</i>	2013	FD	KTP
Alteration of habitat following subsidence due to longwall mining	2005	FD	KTP
Alteration to the natural flow regimes of rivers and streams and their floodplains and wetlands	2002	FD	KTP
Anthropogenic Climate Change	2000	FD	KTP
Bushrock removal	1999	FD	KTP
Camphor laurel most toxic chemotypes	2004	FD	0-reject
Clearing of native vegetation	2001	FD	KTP
Competition and grazing by the feral European Rabbit	2002	FD	KTP
Competition and habitat degradation by Feral Goats	2004	FD	KTP
Competition from feral honeybees <i>Apis mellifera</i>	2002	FD	KTP
Death or injury to marine species following capture in shark control programs on ocean beaches	2003	FD	KTP
Entanglement in or ingestion of anthropogenic debris in marine and estuarine environments	2004	FD	KTP
Predation by the European Red Fox, <i>Vulpes vulpes</i>	1998	FD	KTP
Forest eucalypt dieback associated with over-abundant psyllids and Bell Miners	2008	FD	KTP
Herbivory & environmental degradation caused by feral deer	2004	FD	KTP
High frequency fire resulting in the disruption of life cycle processes in plants and animals and loss of vegetation structure and composition	2000	FD	KTP
Importation of Red Imported Fire Ants <i>Solenopsis invicta</i> into NSW	2002	FD	KTP
Incidental catch or bycatch of seabirds during Long line fishing operations	1997	FD reject	0-reject
Infection by Psittacine Circoviral (beak and feather) Disease affecting endangered psittacine species and populations	2002	FD	KTP
Infection of frogs by amphibian chytrid causing the disease chytridiomycosis	2003	FD	KTP
Infection of native plants by <i>Phytophthora cinnamomi</i>	2002	FD	KTP
Introduction and establishment of Exotic Rust Fungi of the order Pucciniales pathogenic on plants of the family	2011	FD	KTP

Established under the Biodiversity Conservation Act 2016

Myrtaceae			
Introduction of the Large Earth Bumblebee, <i>Bombus terrestris</i> (L.)	2004	FD	KTP
Invasion and establishment of escaped exotic garden plants (Archive)	2010	FD	0-reject
Invasion and establishment of exotic vines and scramblers	2006	FD	KTP
Invasion and establishment of Scotch Broom, <i>Cytisus scoparius</i>	2007	FD	KTP
Invasion and establishment of the Cane Toad, <i>Bufo marinus</i>	2006	FD	KTP
Invasion establishment and spread of Lantana (<i>Lantana camara</i>)	2006	FD	KTP
Invasion of native plant communities by African Olive, <i>Olea europaea</i> subsp. <i>cuspidata</i>	2010	FD	KTP
Invasion of native plant communities by <i>Chrysanthemoides monilifera</i> (Bitou bush)	1999	FD	KTP
Invasion of native plant communities by exotic perennial grasses	2003	FD	KTP
Invasion of the Yellow Crazy Ant <i>Anoplolepis gracilipes</i> into NSW	2005	FD	KTP
Loss and degradation of native plant and animal habitats by invasion of escaped garden plants, including aquatic plants	2011	FD	KTP
Loss and/or degradation of sites used for hill-topping by butterflies	2001	FD	KTP
Loss of Hollow-bearing Trees	2007	FD	KTP
Predation by <i>Ganbusia holbrooki</i> , Plague Minnow or Mosquito fish	1999	FD	KTP
Predation and Hybridisation by Feral Dogs <i>Canis lupus familiaris</i>	2009	FD	KTP
Predation by the Feral Cat	2000	FD	KTP
Predation by the Ship Rat <i>Rattus rattus</i> on Lord Howe Island	2000	FD	KTP
Predation, habitat degradation, competition and disease transmission by Feral Pigs, <i>Sus scrofa</i>	2004	FD	KTP
Removal of dead wood and dead trees	2003	FD	KTP
