

NSW SCIENTIFIC COMMITTEE

Index to Final Determinations – 1996 –2017

(Updated to 14/07/2017)

The NSW Scientific Committee is established under the Threatened Species Conservation Act and commenced in 1996. The Committee identifies and assesses species and other entities for listing as threatened in the Schedules of the Act as follows:

Schedule 1A – Critically endangered species (CRES) and critically endangered ecological communities (CR EEC)

Schedule 1 – Species presumed extinct (SPE), endangered species (ES), endangered populations (EP) and endangered ecological communities (EEC)

Schedule 2 – Vulnerable species (VS) and vulnerable ecological communities (VEC)

Schedule 3 – Key threatening processes (KTP)

Final determinations, which give the reasons for listing, are available for those entities listed or reviewed by the Committee since the Act commenced in 1996. Species that were already listed in the Schedules at the commencement of the Act and have not been reviewed since then do not have a Final determination. Provisional listings (PL) on an emergency basis are also included in this list until they are superseded by a Final Determination.

The Committee may also make minor amendment Determinations under Section 36a (S36a) of the Act to correct minor errors or omissions or to make changes to species names as a result of taxonomic revision. S36a Determinations may relate to one or two species eg Giant Dragonfly (taxonomic split) and these Determinations have been included in the Index. Other section 36A Determinations which make changes to a large number of species are not included in the Index. These Determinations may be viewed on the website at:

<http://www.environment.nsw.gov.au/committee/schedulesthreatenedspeciesconservationct.htm>

Some Determinations in the index have been identified for transfer to an Archive Determination page which is yet to be created. Some early Determinations have already been removed from the website while later Determinations may still be available. After checking the website, please contact Sue Chate on 02 9585 6940 or email sue.chate@environment.nsw.gov.au if you wish to access a Determination that is not on the website.

A year marked with an asterisk (*) in the index shows the year the species was added to the Schedules following a provisional listing on an emergency basis. The later year is when the listing was confirmed with a Final Determination.

⁺Year - Please note that the “Year” column shows the year a Final Determination was made for the listing of the species etc. at the status shown. It should not be assumed that this is the year the species was added to the Schedules. A number of species that were already listed have been either upgraded or downgraded within the Schedules. Please read the Final Determination to check if it is a newly listed species or a change in status of an already listed species.
