Subject: Native Vegetation Regulations

I am disappointed to hear that NSW Government is proposing major changes to native vegetation laws that will allow for an increase in land clearing in large parts of NSW.

It is a retrograde step which will have serious negative impacts on our water quality and wildlife. The Native Vegetation Act 2003 was introduced because NSW had one of the worst records for land clearing in the world.

Please do not make changes that will weaken environmental protection for our land and wildlife.
