Subject: Objection to commercial logging of native forests

We in Canberra do not want to see increasing use of firewood when it comes from logging native forests and threatened species habitat. I am greatly concerned about the issue of logging native forests, I believe the Private Native Forestry Code of Practice was written to protect native forests and endangered species, yet I have become aware that there is a specific threat to the Mt Rae Forest area between Crookwell and Taralga. Would you please assure me that close attention is being given to any logging carried out in this area and that it strictly complies with the Code.

Yours sincerely

Dianne Piper
