Subject: Take action today to protect our native landscapes and wildlife

Dear Sir/Madam

So much of Australian Bush has been lost so many native species of animals have been lost for ever due to the land clearing destruction. All though people who have fought for environmental protection are seen as too extreme in their efforts I see and believe the future will show that the Governments have been negligent in the care of biodiversity which ends up leaving society a spiritually and economically a more barren place.

Our tribal community elders would make sacrifices to the rivers mountains and forests now our leaders are willing to sacrifice those very precious things.

Please fight for our childrens future, we tell the children to care, how about government doing that.

Our state's native vegetation provides essential environmental, social and economic benefits, including protecting water quality, maintaining soil health and providing wildlife habitat for threatened species.

I am strongly opposed to the government's proposal to allow clearing, thinning and burning of large areas of native vegetation without assessment and approval by a Catchment Management Authority. These activities will have a serious impact on the environment, and should not be classified as 'routine agricultural management activities'.

The changes proposed in the draft *Native Vegetation Regulation* will place large areas of native vegetation at risk. The proposal to allow clearing of invasive native species and thinning of native vegetation without advice and approval from a CMA has the potential to result in the loss of hundreds of thousands of hectares of native vegetation. I am also opposed to proposals to weaken offset rules and facilitate clearing of paddock trees and small patches in cultivation.

I am deeply alarmed by news that the Shooters and Fishers Party intend to introduce legislation to repeal the *Native Vegetation Act 2003*. We cannot afford to return to the era of broadscale land clearing, when millions of hectares of forests and woodlands were destroyed. The government must uphold strong native vegetation laws so that we don't return to the unsustainable practices of the past.

We need stronger laws to protect for our wildlife and native vegetation, not weaker ones. I urge you to maintain the environmental protections in our native vegetation regulations, and to vigorously oppose any move to repeal the *Native Vegetation Act 2003*.
