

Priorities Action Statement

Sun Valley Cabbage Gum Forest in Sydney Basin Bioregion (Sun Valley Cabbage Gum Forest in Sydney Basin Bioregion)

Action Title	Priority
Establish community based restoration project to regenerate and reconnect fragments across Sun Valley.	2
Liaise with Sun Valley landholders about the value of the community and encourage them to protect remnants from threats such as grazing, weeds, mowing and clearing and to incorporate the community as a natural feature in landscaping.	1
Liaise with community to encourage cooperation and involvement in recovery actions.	2
Protect remnants by fencing to prevent livestock grazing.	1
Actively control weeds in EEC remnants using bush regeneration techniques.	1
Seek expert ecological advice from DEC when considering bushfire hazard reduction near this community.	1
Protect this community through local government planning and through PVP process. Attach protective PoM and covenant as consent conditions to prevent impacts of development.	1
Encourage landholders to enter VCAs or other secure agreements to protect remnants on their land.	1
Set aside part of recreation reserve containing this community for the sole purpose of conservation.	2
Develop and implement fire management plan.	2
Prepare and disseminate EIA guidelines.	1
Examine the relationship of this community to other communities on diatreme substrates in the area as it may form part of a larger complex.	2
