

Species attributes

Scientific name:	<i>Boronia repanda</i>
NSW status:	Endangered
Commonwealth status:	Endangered
Management stream:	Site-managed

Photographer: Murray Fagg

Overall project status*

Populations at all sites are on target.

Populations at one or more sites were not monitored this year, but threat management is on target.
Populations at remaining sites are on target.

Populations at one or more sites were not monitored this year, but threat management is not on target.
Populations at remaining sites are on target.

Populations at one or more sites are not on target.

* For SoS priority management sites (may not include all locations where the species occurs in NSW)

Project summary

Priority management sites:	Ruby Creek
Action implementation:	2 of 2 actions were implemented as planned for the financial year (includes species population monitoring actions + other project actions fully or partially implemented)
Total expenditure:	\$4,330 (\$3,280 cash; \$1,050 in-kind)
Project partners:	Office of Environment and Heritage

Management site 1: Ruby Creek

LGA: Tenterfield

Project partners: Office of Environment and Heritage

Estimated species population size: Approximately 1,000

No actions were implemented at this site for this financial year.

Species population monitoring was not conducted at this site this financial year (not required annually). The species population is inferred to be on target based on threat management being on target.

Site summary

Site condition has been maintained from previous year and population was observed flowering in summer and autumn. Protective fencing has been erected around the eastern sub-population to protect the species from grazing and road maintenance works.
