

Saving our Species project 2013-14 annual report card

Rusty Desert Phebalium

Species attributes

Scientific name:	<i>Phebalium glandulosum</i> <i>subsp. eglandulosum</i>
NSW status:	Endangered
Commonwealth status:	Vulnerable
Management stream:	Site-managed

Photographer: Peter Clarke

Overall project status*

- Populations at all key management sites are generally stable or increasing
- All management is being implemented as planned; too early to detect response to management at some sites
- Management at some sites requires review/amendment to ensure that the project is likely to meet its objectives
- Major review of / changes to the project required to ensure long-term objectives are likely to be met

*For SoS priority management sites (may not include all locations where the species occurs in NSW)

Project summary

Key management sites:	Torrington State Conservation Area; Rock of Gibraltar
Action implementation:	2 of 2 actions were implemented as planned for the financial year (includes species population monitoring actions + other project actions fully or partially implemented)
Total expenditure:	\$5,814 (cash and in-kind)
Project partners:	Office of Environment and Heritage

Management site 1: Torrington State Conservation Area

LGA: Tenterfield

Project partners: Office of Environment and Heritage

Species population monitoring action

Reported trends are based on best available information

Estimated population	Population monitoring conducted	Conducted by	Trend
1,000	Yes	Office of Environment and Heritage	Decreasing

Investment

This includes cash and in-kind contributions

Project participant	Investment
Office of Environment and Heritage	\$2,924

Site summary

Monitoring established. Population of 112 plants discovered, ninety plants tagged.

Management site 2: Rock of Gibraltar

LGA: Tenterfield

Project partners: Office of Environment and Heritage

Species population monitoring action

Reported trends are based on best available information

Estimated population	Population monitoring conducted	Conducted by	Trend
100	Yes	Office of Environment and Heritage	Decreasing

Investment

This includes cash and in-kind contributions

Project participant	Investment
Office of Environment and Heritage	\$2,890

Site summary

Previously known population at Rock of Gibraltar not re-discovered during survey. Monitoring not able to be established. Further survey planned.
