

Saving our Species project 2014-15 annual report card

Summer Leek Orchid

Species attributes

Scientific name:	<i>Prasophyllum canaliculatum</i>
NSW status:	Critically endangered
Commonwealth status:	Not listed
Management stream:	Site-managed

Photographer: Jackie Miles

Overall project status*

- Stable or increasing population trend for all key management sites
- Population trend not determined for some key management sites; too early to determine overall status
- Decreasing population trend for at least one key management site; project review triggered

*For SoS priority management sites (may not include all locations where the species occurs in NSW)

Project summary

Key management sites:	South East Forests National Park
Action implementation:	2 of 2 actions were implemented as planned for the financial year (includes species population monitoring actions + other project actions fully or partially implemented)
Total expenditure:	\$5,888 (cash and in-kind)
Project partners:	Office of Environment and Heritage

Management site 1: South East Forests National Park

LGA: Bombala

Project partners: Office of Environment and Heritage

Species population monitoring action

Reported trends are based on best available information

Estimated population	Population monitoring conducted	Conducted by	Trend
61	Yes	Office of Environment and Heritage	Stable

Investment

This includes cash and in-kind contributions

Project participant	Investment
Office of Environment and Heritage	\$5,888

Project actions

The project actions below are those identified as being required in 2014-15 to secure the species in the wild

Threat	Management/monitoring action description	Implemented as planned?
Grazing by feral deer.	Shooting by contractor.	Yes

Site summary

Site monitoring by consultant botanist; 61 plants seen. National Parks and Wildlife Services conducted culling of deer that were threatening site.
