

Species attributes

Scientific name:	<i>Boronia ruppia</i>
NSW status:	Endangered
Commonwealth status:	N/A
Management stream:	Site-managed

Photographer: John B Williams

Overall project status*

Populations at all sites are on target.

Populations at one or more sites were not monitored this year, but threat management is on target.
Populations at remaining sites are on target.

Populations at one or more sites were not monitored this year, but threat management is not on target.
Populations at remaining sites are on target.

Populations at one or more sites are not on target.

* For SoS priority management sites (may not include all locations where the species occurs in NSW)

Project summary

Priority management sites:	Woodsreef
Action implementation:	1 of 1 actions were implemented as planned for the financial year (includes species population monitoring actions + other project actions fully or partially implemented)
Total expenditure:	\$3,600 (\$2,000 cash; \$1,600 in-kind)
Project partners:	Office of Environment and Heritage

Management site 1: Woodsreef

LGA: Tamworth Regional
Project partners: Office of Environment and Heritage
Estimated species population size: 200

Population status

Not on target

Baseline

Index	Monitoring result	Confidence in monitoring	Conducted by
Species abundance	Plant health was variable across sub-populations in 2015 and early 2016 but adequate to maintain a stable population. Rapid herbivory occurred during autumn 2016 on certain sub-populations due to grazing from macropods and to a lesser extent goats.	Moderate	Office of Environment and Heritage

Investment

Project participant	Cash	In-kind
Office of Environment and Heritage	\$2,000	\$1,600

Site summary

Species has received increased documentation of population size and condition, and protection is being escalated.
