<p>I think that essentially any plan to preserve original native bushland anywhere in NSW in perpetuity is worth considering. However I have concerns about how the funds are raised, ie by BioBanking or Biodiversity Conservation Fund and how any parcel of private land can be secured forever. Because that is what is needed.</p> <p>An absolute and immediate stop to the removal of trees, especially those which have been a part of our ecosystem for 1000s of years.</p> <p>How can a government put a value on a tree? Each tree we now have left must be saved. All flora in NSW has suffered clearing since settlement of between 10-90% (David Keith Ocean Shores to Desert Dunes 2006).</p>
