1. How to use these guidelines

These guidelines provide an overview of the NSW Environmental Trust's (Trust) Remanufacture NSW Round 2 – Stream 1 Infrastructure Grants Program, including organisations that are eligible to apply and the types of projects that may be funded. It also outlines how your application will be assessed and what to expect if you are awarded a grant.

1.1 Enquiries or questions

For application assistance

NSW Environmental Trust

Phone: (02) 8837 6093

Email: waste.recycling@environmentaltrust.nsw.gov.au

For general program or project assistance or to discuss project ideas

NSW Environment Protection Authority

Phone: (02) 9995 6179, (02) 9995 6920 or (02) 9995 5596

Email: infrastructure.grants@epa.nsw.gov.au

Closing date for application

5 pm Friday, 11 March 2022

Late submissions and incomplete applications will not be accepted.

For all website links detailed in these guidelines, please see Section 3 – More Information.

2. About this funding program

2.1 Council of Australian Governments Export Ban

In March 2020, The Council of Australian Governments (COAG) agreed to phase out the export of certain waste materials. The COAG decision followed increasing community concern about the impact of exported Australian waste on developing countries and changes to the local recycling industry resulting from import restrictions on waste, particularly China's National Sword Policy. Introduced in 2018, China's National Sword Policy established strict contamination standards for the import of waste into China. Following the introduction of this policy, other countries also increased controls around imported waste, further disrupting the business models of some local recyclers.

For a full description of the materials subject to the COAG waste export ban and details on when the bans commence, visit the Department of Agriculture, Water and Environment website (see Section 3 – More Information for the link). The purpose of the ban is not to stop all waste-derived materials from being exported but to stop the export of untreated and unprocessed wastes, which may have negative human health and/or environmental impact in the receiving country. The ban also aims to maximise the capability of our waste management and recycling sector to collect, recover, recycle, reuse, and process waste materials.

The Australian Government is working with states and territories and industry to co-invest in recycling infrastructure through the Recycling Modernisation Fund to address the need to capture more materials for cost-effective recycling.

2.2 About the Recycling Modernisation Fund

To support the COAG waste export bans, the Australian Government announced a \$190 million Recycling Modernisation Fund (RMF) that will generate \$600 million of recycling investment and drive a billion-dollar transformation of Australia's waste and recycling capacity.

The RMF supports innovative investment in new infrastructure to sort, process and remanufacture materials such as mixed plastic, paper, tyres and glass.

The Australian Government and state and territory governments recognise that they have a mutual interest in improving outcomes in Australia's waste and recycling sector and will work together to achieve those outcomes.

2.3 Remanufacture NSW grant program

It is estimated that the COAG ban will impact the annual export of at least 180,000 tonnes of glass, plastic, tyres and paper/cardboard.

Remanufacture NSW aims to maximise recycling and reuse activities, contributing to meeting the Australian and NSW Governments' resource recovery targets and keeping resources within the circular economy.

Remanufacture NSW is a \$35 million funding program jointly funded by the Australian Government's Recycling Modernisation Fund and the NSW Government's Waste Less, Recycle More initiative.

Round 1 of the program offered \$35 million, and the funds were not fully exhausted; therefore a second round is now being offered with the remaining funds.

Remanufacture NSW is delivered by the NSW Environmental Trust (the Trust) in partnership with the NSW Environment Protection Authority (EPA).

2.4 Remanufacture NSW Round 1

Remanufacture NSW, Round 1 opened in January 2021 and was well subscribed. In August 2021, 22 projects were awarded a combined total of \$24,154,082 of funding, including 18 under Stream 1 (Infrastructure) and 4 under Stream 2 (Trials). Four projects have since withdrawn or accepted a reduced amount, resulting in approximately \$2.6 million of additional funding becoming available in Round 2.

Projects awarded funding in Round 1 are spread across metropolitan and regional NSW and cover all material types subject to the COAG waste export ban. The infrastructure projects are expected to increase the state's recycling capacity by an estimated 120,000 tonnes per annum once operational.

For a summary of Remanufacture NSW Round 1 projects proceeding, please visit the Trust website (see Section 3 – More Information).

2.5 Remanufacture NSW Round 2 (this round)

Following the awarding of projects under Remanufacture NSW Round 1, a gap analysis was conducted of the materials identified in the COAG Export Ban Response Strategy, measured against the new processing capacity that those projects will achieve. The analysis shows that Round 1 projects should close the gap for unprocessed glass (currently exported overseas), but there remained a significant processing gap in New South Wales for waste plastic, paper/cardboard and, to a lesser extent, tyres.

To address this gap Round 2 of Remanufacture NSW will target waste plastics, paper/cardboard and tyres. (note that glass is excluded from this round). Approximately \$13.5 million of funding remaining from Round 1 of the program is available this round.

2.6 NSW Environmental Trust

The NSW Environmental Trust (the Trust) is an independent statutory body established by the NSW Government to fund a broad range of organisations to undertake projects that enhance the environment of New South Wales. The Trust is empowered under the *Environmental Trust Act 1998*. The Trust's main responsibility is to make and administer grant funding rounds to establish and administer these projects.

The Trust organises the assessment and approval process for grants and monitors projects to ensure good governance, appropriate expenditure of grant funds, timely delivery and the satisfactory achievement of agreed outcomes. The Trust liaises with the grantee throughout the life of the project to ensure satisfactory performance is maintained and agreed outcomes are delivered. Once the grant is established, all correspondence relating to the grant is through the Environmental Trust.

2.7 NSW Environment Protection Authority

The NSW Environment Protection Authority (EPA) is an independent statutory authority and the principal environmental regulator in New South Wales. It leads the state's response to managing a diverse range of activities that can impact the health of the NSW environment and its people, using a mix of tools including education, partnerships, licensing and approvals, audit, enforcement and economic mechanisms.

The EPA is empowered under the *Protection of the Environment Administration Act 1991* (POEO Act). The EPA manages the independent Application Advisory Service and the Financial and Economic Analysis assistance available to applicants under this round. The EPA provides technical and regulatory advice to the Environmental Trust throughout the grant management process as needed.

2.8 Remanufacture NSW Round 2 – Streams 1 and 2

There are two funding streams available:

Stream 1 (Infrastructure) Applicants applying for an infrastructure grant which is not for a **trial** (refer to Key Terms for a definition of Trials) should do so under Stream 1.

Stream 2 (Trials) Applicants applying for a grant to fund a **trial** (refer to Key Terms for a definition of Trials) should apply under Stream 2. Examples of eligible trial projects are provided under 'Projects that will be considered for funding'.

Please ensure that you select the relevant application form and guidelines.

This **Guideline is for Stream 2 – Trials grants only.**

Grants are available for trials addressing mixed waste plastics, paper/cardboard and tyres only. Trials addressing glass are not eligible for funding in Round 2.

Under this program, trials are small-scale projects designed to test the feasibility of innovative technologies and methodologies that can increase recycling or reuse of materials that are subject to the waste export ban. The trial should test technologies/methodologies that can be scaled up to full implementation/rolled out more broadly and become business-as-usual if the trial is successful.

2.8.1 Objectives

Remanufacture NSW Round 2 Stream 2 (trials) provides co-investment for trial projects that address waste plastics, paper/cardboard or tyres. The objective of this stream is to provide opportunities for new innovative technologies and methodologies to be tested, support the trial of greater collaboration throughout the supply chain, and promote trials of a more holistic approach to the reuse and recycling of waste export ban materials using circular economy principles.

Successful trial projects will:

- test technologies and methodologies for sorting, processing, recycling and remanufacturing waste plastics, paper/cardboard or tyres
- be monitored closely, and adapted if necessary, so that successful outcomes will be achieved
- deliver a project plan and budget for the roll-out or scaling-up of the trial. It is anticipated that the trial will provide practical experience both for the business conducting the trial and for any other potential proponents.

Trial projects will address waste plastics, paper/cardboard or tyres in one or more of the following ways:

- apply circular economy approaches to the processing and use of these materials
- reduce the amount of these materials going to landfill in New South Wales through collaboration across the supply chain

- demonstrate high-value processing and material recovery of these materials which preserves or creates the most value out of the materials being processed in the most economically efficient manner
- test new markets for these materials and reduce barriers to the growth of new markets, including showcasing and providing proof of performance for innovative reuse of materials (including in the manufacture of products or in construction projects)
- model job creation and economic value, so that successful projects may be rolled out/scaled up across other regions
- support products that incorporate these materials to meet, or demonstrate that they meet, existing standards and specifications, or to help industry develop new specifications and standards for products that incorporate these materials.

2.9 Eligibility

2.9.1 Eligible organisations

At the time of applying the applicant must hold an Australian Business Number (ABN) and be either:

- an Australian entity or partnership incorporated under the *Corporations Act 2001 (Cth)*
- an Australian research institution can be a tertiary education institution, a government agency established for the purpose of research, a Cooperative Research Centre, an Institute or Centre of Research or a privately owned and accredited research facility. Consultancies are not considered to be research institution for the purpose of this grant program. Note that privately owned research facilities must provide evidence of accreditation (e.g. National Association of Testing Authorities, Australia, or similar)
- a council (as defined in the *NSW Local Government Act 1993*), regional organisation of councils or other, local government-controlled organisation
- a state government entity
- a non-government/not-for-profit organisation (must comply with the ATO's definition - see Section 3 – More Information) with an established legal status, or those without a legal status that are able to have grant funds administered by another organisation with legal status.

Note: for successful applicants the following Australian Government requirements will apply:

- the *Building and Construction Industry (Improving Productivity) Act 2016*, requires that financial contributions to a building project or projects are only made where a builder or builders are accredited under the Australian Government Building and Construction WHS Accreditation Scheme
- compliance with the Code for the Tendering and Performance of Building Work 2016 (Building Code 2016) is a condition of Australian Government funding (see Section 3 – More Information).

2.9.2 Projects that will be considered for funding

Under Stream 2, examples of projects that **will** be considered for funding include:

- trials that support reuse of waste plastic, paper/cardboard or tyres
- trials that aim to increase the capacity of manufacturers to use recycled waste plastics, paper/cardboard or tyres in their products and to provide secure markets for these recycled materials. Examples include new/modified equipment to increase the use of

recycled materials, such as post-consumer plastic, in the manufacture of goods or products

- trials that test new infrastructure/equipment to sort, wash, dry, shred, flake, granulate or pelletise materials
- projects that test equipment upgrades or process improvements to existing MRFs to increase the quality of output materials, reduce contamination and/or increase capacity
- trials that test upgrading plastic sorting, processing and manufacture technology to produce cleaner streams of plastic and have the potential to use larger amounts of recycled plastics
- trials that test new methods of paper beneficiation so that local paper mills can accept higher volumes of paper and cardboard
- trials that test new methodologies or technologies to process Liquid Paper Board
- trials that test plastic processing, remanufacturing and new applications for recycled plastics
- trials that test mobile processing equipment
- trials that use new technologies or methods to reuse or recycle end-of-life tyres.
- trials that test innovative supply chain models to increase the recycling and reuse of waste plastics, paper/cardboard, and tyres.

2.9.3 Projects that will not be funded

Examples of projects that **will not** be funded include:

- projects that do not predominantly address waste plastics, paper/cardboard or tyres (minimum 80%) for example e-waste projects
- projects and budget items that do not align with the objectives of this grant program.
- projects not located in New South Wales
- projects that do not predominantly address materials generated in New South Wales.
- projects submitted by applicants who are unable to demonstrate that they have the financial capacity to undertake the project
- projects that produce documents only and do not deliver infrastructure (e.g. feasibility studies, scoping documentation, business case development, designs and educational programs)
- projects that focus solely on the production of resources and promotional items, e.g. app development, marketing campaigns, market development, or desktop research
- projects that focus solely on research and development
- Projects that transport waste generated in New South Wales out of state for disposal without a valid exemption
- energy from waste projects, including:
 - construction or modification of any facility that uses waste material as an energy source
 - construction or modification of facilities that primarily produce fuels from waste inputs, including refuse derived fuel (RDF), processed engineered fuel (PEF), tyre derived fuel (TDF), crude oils, liquid or gaseous fuels or transport fuels
 - construction or modification of pyrolysis facilities
- proposals that provide no evidence of potential to increase New South Wales' capacity to process or reuse waste plastics, paper/cardboard or tyres once export of that material is banned

- projects that are not aiming to scale up or roll out after completion
- projects that focus on routine or cyclical maintenance works
- projects that focus solely on collection and transportation infrastructure
- projects commenced or completed prior to the signing of the Deed of Agreement (Deed)
- projects that cannot demonstrate that they will be able to operate lawfully (including complying with the COAG waste export ban).

2.9.4 Conditions of eligibility

Eligible organisations must meet the following conditions to qualify for this funding:

- all relevant Environmental Trust forms and supporting documents must be submitted
- include in your application the names of 2 senior officers in your organisation (e.g. General Manager, CEO, Chief Financial Officer, Group Manager or Secretary) who can attest to the accuracy of the information within the application
- projects should aim to be completed by **30 June 2024**
- applications must be received by **5 pm, Friday 11 March 2022**. Late applications will not be accepted.

Applications that do not satisfy all of the above conditions will be deemed ineligible and will not be assessed.

2.9.5 Project activities that will and will not be funded

The following table provides a matrix with examples of various project activities that are or are not eligible for grant funding. The table also identifies whether different activities are considered eligible as either co-contribution or in-kind contribution (to be specified in the Application budget).

If an item is not included in the table below, please contact the EPA to confirm if the item is eligible for funding before including it in your application.

Table 1 What can and cannot be funded – Stream 1 Remanufacture NSW Round 2

Types of activities	Item/activity	Further description or examples (if relevant)	Eligible for grant funding	Eligible as part of co-contribution	Eligible as part of in-kind contribution
Land acquisition or lease	Acquisition or leasing of land or premises		No	No	No
Planning approval. Licensing costs	Costs associated with obtaining relevant planning approvals and environmental licensing	For example, consultants who support or undertake: Development Approval applications, Environmental Protection Licence applications, Environmental Impact Assessments and Environmental Impact Statements	No	Yes	No
Project management and administration costs	Sampling and testing, including lab testing	Only for the purpose of the trial	Yes	Yes	Yes
	Consultant time and expert advice to meet or develop industry standard related to the trial	Capped at 2% of the total grant request	Yes	Yes	Yes
	Project management costs – internal	Activities that will contribute to sustained change in skills and behaviour, such as staff	No	No	Yes

Stream 2 Remanufacture NSW (Trials) Guidelines for Applicants – Round 2

Types of activities	Item/activity	Further description or examples (if relevant)	Eligible for grant funding	Eligible as part of co-contribution	Eligible as part of in-kind contribution
		training and evaluation of the project to inform future scaling-up of projects			
	Project management costs – by consultant	Activities that will contribute to sustained change in skills and behaviour, such as staff training and evaluation of the project to inform future scaling-up of projects	No	Yes	No
		Activities that will contribute to sustained change in skills and behaviour, such as staff training and evaluation of the project to inform future scaling-up of projects	No	Yes	Yes
	Costs associated with the application or gaining or funding		No	No	No
	Project contingency funds		No	No	No
Construction and buildings	Upgrading site energy inputs for trial	For example, upgrading a transformer	Yes	Yes	No

Stream 2 Remanufacture NSW (Trials) Guidelines for Applicants – Round 2

Types of activities	Item/activity	Further description or examples (if relevant)	Eligible for grant funding	Eligible as part of co-contribution	Eligible as part of in-kind contribution
	Purchase and installation of signage for trial	For example, directional, wayfinding and promotional	No	No	No
Equipment and related costs	Purchase or lease and installation of processing equipment		Yes	Yes	Yes
	Modifications to existing processing equipment		Yes	Yes	Yes
	Purchase or lease of equipment already owned by the applicant, a project partner or an associated entity of either		No	No	No
	Purchase (or lease) and installation of systems to minimise environmental harm or comply with environmental regulation	For example, wheel washes, dust suppression systems, noise minimisation systems, stormwater management systems, fire safety systems	Yes	Yes	Yes
	Purchase or lease of infrastructure control panels		Yes	Yes	Yes
	Purchase or lease of software relating to		Yes	Yes	Yes

Stream 2 Remanufacture NSW (Trials) Guidelines for Applicants – Round 2

Types of activities	Item/activity	Further description or examples (if relevant)	Eligible for grant funding	Eligible as part of co-contribution	Eligible as part of in-kind contribution
	infrastructure control panels				
	Freight and shipping fees	For example, for delivery or new equipment	Yes	Yes	No
	Customs and/or duties	For example, for new equipment	Yes	Yes	No
	Purchase (or lease) and installation of collection infrastructure and equipment other than skips and bins	For example, balers, compactors, reverse vending machines. * Please contact the EPA to discuss eligibility	Maybe*	Yes	Yes
	Purchase of bins and skips	The bins and skips must be directly related to the project. *Please contact the EPA to discuss eligibility	No	Maybe*	Yes
Vehicles and mobile processing	Mobile processing equipment	For example, shredders, compactors	Yes	Yes	Yes
	Lease of vehicles required to move mobile processing equipment, or the product produced		Yes	Yes	Yes

Stream 2 Remanufacture NSW (Trials) Guidelines for Applicants – Round 2

Types of activities	Item/activity	Further description or examples (if relevant)	Eligible for grant funding	Eligible as part of co-contribution	Eligible as part of in-kind contribution
	by mobile processing equipment				
	On-site process vehicles – hire	For example, material handlers, front end loaders, excavators, fork-lifts for the duration of the trials only Capped at 10% of the total grant request	Yes	Yes	Yes
	On-site process vehicles – purchase	For example, material handlers, front end loaders, excavators, fork-lifts	No	Yes	Yes
	Purchase of vehicles required to move mobile processing equipment, or the product produced by mobile processing equipment		No	Yes	Yes
	Logistics vehicles	For example, prime movers, front lift/side lift trucks, walking floor trucks With the exception of projects involving mobile processing. See earlier item	No	No	No

Stream 2 Remanufacture NSW (Trials) Guidelines for Applicants – Round 2

Types of activities	Item/activity	Further description or examples (if relevant)	Eligible for grant funding	Eligible as part of co-contribution	Eligible as part of in-kind contribution
Market development	Supply Chain facilitation	For example, facilitate collection, logistics and relationships across the supply chain	Yes	Yes	Yes
	Market development costs related to the trial	For example, work with consultants for focus markets, product promotion etc.	No	Yes	Yes
	Promotional activities	For example, websites, education, marketing	No	No	No
Other Costs	Work Health and Safety activities	Including training and the provision of PPE	No	No	No
	Ongoing operational costs	Such as, but not limited to, salaries, electricity, water and other utilities	No	No	No
	Ongoing maintenance of projects to which organisations have committed as part of a previous grant or another project		No	No	No
	Activities or equipment for which applicants have received funding or support from other		No	No	No

Stream 2 Remanufacture NSW (Trials) Guidelines for Applicants – Round 2

Types of activities	Item/activity	Further description or examples (if relevant)	Eligible for grant funding	Eligible as part of co-contribution	Eligible as part of in-kind contribution
	funding sources (e.g. other grant programs)				
	Requests for retrospective funding	Where activities are completed or have begun prior to the signing of the Deed of Agreement (Deed)	No	No	No

2.9.6 Compliance with laws including NSW environment protection laws

The Environmental Trust will consider the compliance history of applicants under NSW environment protection laws, including penalty notices, clean-up notices, prevention notices, licence suspensions, licence revocations, convictions or prosecutions under the *National Parks and Wildlife Act 1974*, *Biodiversity Conservation Act 2016*, *Protection of the Environment Operations Act 1997* (POEO Act) and *Protection of the Environment Operations (Waste) Regulation 2014* (POEO Waste Regulation).

In addition, applicants are not eligible for the grant if they, or any directors or managers of the applicant organisation (whether as directors or managers of the applicant or otherwise in their personal capacity, including where they have been directors or managers of other companies), have contravened any provision of the POEO Act or POEO Waste Regulation with the result of avoiding, minimising or undermining the requirement to pay any waste contributions required under section 88 of the POEO Act.

For the purposes of this matter, the relevant provisions of the POEO Act are sections 48, 64, 88, 115, 120, 142A, 143, 144, 144AA, 144AB and 211 of the POEO Act or Part 2 of the POEO Waste Regulation in relation to any waste activities where a consequence of the contravention has the result of the avoidance, minimisation or undermining of the waste contribution. This includes incorrect or inadequate recording and reporting and the provision of false or misleading information about waste. A contravention of any clause of a resource recovery exemption will also be ineligible.

These matters will be taken into account whether or not any regulatory action has taken place in relation to those contraventions, including whether or not court proceedings have been commenced or an offence has been proven in court proceedings.

2.9.7 Exporting waste export ban material outside of Australia

The applicant is required to advise whether they, a project partner or related organisation will transport or arrange the transportation of materials subject to the waste export ban outside of Australia at any time during the life of any grant awarded.

Should your organisation be found to be involved in transportation of waste export ban materials outside of Australia without evidence of an exemption (after the ban for that material comes into effect) any grant awarded will be terminated immediately and all grant funding will have to be repaid to the Environmental Trust.

Note: Organisations may seek an exemption to the waste export ban from the Australian Government. Applications for exemptions are considered on a case by case basis.

2.9.8 Planning approvals and licensing

Some proposals may not be permissible or may have significant planning challenges due to their location and/or environmental constraints. Applicants must ensure that their proposed project is permissible under the *NSW Environmental Planning and Assessment Act 1979*.

Before you begin your application, **you must:**

- familiarise yourself with the planning approvals required for the project to proceed
- contact the relevant consent authority (council or Department of Planning, Industry and Environment) to discuss your proposal.

When submitting your application, provide the following supporting information to strengthen your application:

- evidence of any discussions with the relevant consent authority (e.g. contact name, emails, letters and details of meetings)
- any other material that demonstrates required approvals will be achieved in a timely manner.

Note: For some trials, a development consent and an Environment Protection Licence may be required.

In preparing your application, you should consider any potential licensing requirements for the processing or on-site storage of waste and should currently be manufacturing in New South Wales.

For further information on licence requirements and/or applications contact the EPA or visit the EPA licence forms website (see Section 3 – More Information).

2.10 Funding

Approximately \$13.5 million is available for this round of Remanufacture NSW, through Stream 1 (Infrastructure) and Stream 2 (Trials) grants. In Stream 2 grants of between \$50,000 and \$1,000,000 are available, covering up to 50% of the eligible project costs relating to the trials.

2.10.1 Applicant co-contribution

Applicants are required to provide a minimum cash co-contribution of 50% of eligible project costs.

If the applicant is successful, the cash co-contribution must be attributed to payment of specific invoices, throughout the life of the grant, covering at least 50% of the eligible costs.

The co-contribution should be itemised in the Application Budget.

Applications that include a co-contribution greater than 50% will be viewed favourably, as this will maximise government return on investment.

2.10.2 Special consideration

Councils that do not have the capacity to co-contribute 50% of total costs for large infrastructure projects, such as those in remote regional areas of New South Wales, may be eligible to have their co-contribution reduced to 34% of total eligible project costs.

To find out whether your council is eligible for special consideration, please email the EPA, via infrastructure.grants@epa.nsw.gov.au, before you lodge your application.

The metrics used to determine a council's eligibility for special consideration, include, but is not limited to:

- total area (square kilometres) of the local government area (LGA)
- number of rate-paying properties (i.e. residential, business, farmland) within the LGA.

2.10.3 Applicant in-kind contribution

Applicants should list any 'in-kind' contributions in their Application Budget.

Definition of in-kind contribution activities are in the Key Terms Table.

In-kind contributions do not form part of the required co-contribution but may demonstrate additional commitment to the project.

2.10.4 Funding from multiple sources

Some large projects may involve multiple sources of government funding. For the Trust to make fair and informed decisions regarding grants, setting funding priorities and avoiding duplication with other government agencies, you must advise the Trust if you:

- have secured funding from another government agency for the same or related activities to those requested from the Trust in this application
- have current applications lodged with other government agencies for the same project or project activities
- receive funding from other government agencies while your project is underway.

Note: Activities or equipment for which applicants have received funding or support from other funding sources (e.g. other grant programs) will not be funded.

2.10.5 Partnership projects

The Trust encourages applicants to develop projects that include partnerships, collaboration, other funding sources and in-kind contributions. For example, a partnership can be formed between a waste or resource recovery organisation and a research institution, a university or a council to trial new technologies, or methodologies to improve the recycling of one or a combination of waste plastics, paper/cardboard or tyres.

Preference will be given to projects that can demonstrate enduring partnerships between businesses, investors, industry, local councils and, potentially, tertiary/research organisations. Applicants are encouraged to develop partnership projects with an emphasis on **whole-of-supply chain collaboration** to deliver end-to-end solutions for the priority waste materials.

Partnership projects may improve the implementation and reach of projects. Collaborative applications will require a lead applicant that will be accountable for signing the Deed, implementation of the project ensuring achievement of agreed deliverables, and submitting milestone reports.

It is expected that an agreement between all partners in relation to project management, roles, responsibilities and funding contributions is agreed before applying for funds. This agreement should be demonstrated in the grant application and may be provided in the form of a Memorandum of Understanding (MOU) signed by each partner or a letter from each partner detailing their roles, responsibilities and commitments.

A project partner is any organisation or individual, other than the applicant and its employees/contractors, involved in carrying out the project, including:

- investors
- anyone involved in delivery of the project.

An organisation or individual that only leases or provides land to the applicant or project partners and has no other role in the project is not considered to be a project partner. All project partners must be listed in the application, and an intent for an MOU must be submitted with the grant application and a signed MOU provided prior to signing any Deed should funding be awarded.

2.10.6 Third party assistance

While applicants are encouraged to seek collaboration with project partners, and it is acknowledged that they may seek the services of contractors or consultants, careful consideration is required around any commercial relationships.

Applicants may seek third party assistance to prepare and complete their application. However, Trust funding cannot be used to cover the cost of this service. Applicants will need to provide details of their financial and contractual arrangements with any third parties.

The Trust is aware of examples where a third party's rates or charges have been significantly above market rate or have required successful grantees to use preferred suppliers. Applicants must be transparent around their arrangements with consultants so that the Trust can be certain applicants are not being taken advantage of, that projects are as cost effective as possible and that the possibility of actual or perceived fraud or corruption is minimised.

2.10.7 Who must submit the application?

The submission must be made by the applicant organisation. Applicants may seek assistance from consultants or other advisers to develop their proposed projects. However, the application must be submitted by the organisation applying for the grant that holds, or will hold, the licence for the resource recovery facility, should one be required, or is submitting an application in partnership with an organisation that holds, or will hold, the licence for the resource recovery facility. Submissions from third parties will not be accepted.

The application must nominate the primary contact who must be an employee or office holder of the applicant organisation. The primary contact must be available to respond to questions and requests for information from the Trust during the application assessment process and, if the application is successful, for the duration of the project.

2.10.8 Cost-benefit (economic) and financial analysis

Applicants applying for \$100,000 or greater of grant funding must undertake a cost-benefit (economic) and financial analysis. This Analysis ensures that approved projects will provide value for money, are financially viable, will deliver a net public benefit and help to develop the domestic recycling industry. Applicants applying for less than \$100,000 of grant funding do not need to complete a cost-benefit and financial analysis.

For further guidance on completing a cost-benefit analysis, applicants should refer to NSW Treasury's NSW Government Guide to Cost-Benefit Analysis (see Section 3 – More Information) and consider applying to the EPA Application Advisory Service (AAS). See details on how to apply in Section 2.10.9.

Applicants are required to complete their cost-benefit and financial analysis using the template provided on the Trust website. Cost-benefit and financial analysis provided in other formats will not be accepted.

Commercially sound projects that seek to maximise public benefits (e.g. diversion of waste from landfill and other environmental benefits, and creation of new jobs) will be favourably considered. Applicants should provide a detailed analysis of the following criteria to support their application:

- all costs are identified (e.g. capital, operating, maintenance and provision for contingencies)
- all benefits are identified (e.g. avoided costs, savings and revenue from sale of recovered materials)
- all non-market values are identified and quantified

- net benefits are assessed (using the discounted stream of costs and benefits based on NSW Treasury’s Guide to Cost-Benefit Analysis) and include data on:
 - net present value with and without grant funding
 - cost-benefit ratio
 - internal rate of return (percentage)
 - dollars of grant funding per tonne of additional material recycled
 - sensitivity testing (analyse options under different scenarios and discount rates)
- all references, including the data sources and assumptions, are documented.

2.10.9 Application Advisory Service

The EPA provides a free Application Advisory Service (AAS) to support eligible applicants to prepare their grant applications. This service is provided by an independent contractor. Under the AAS the EPA provides up to 8 hours of support to eligible applicants.

The role of the application advisers will be to:

- provide specialist advice to the applicant as it prepares its grant application
- advise on appropriate analysis, content and presentation of information
- provide comment and critical feedback on the quality of the business case presented

The application advisers may cover the following areas of planning and analysis:

- market analysis, including demand for product
- technical analysis, including selection, integration and optimisation of plant and equipment
- cost-benefit analysis, including the preparation of a cost-benefit analysis consistent with NSW Treasury Guidelines and assessment of net public benefits
- financial analysis, including the external costs and benefits
- planning and licensing analysis
- project planning to detail steps involved in commissioning and ongoing operation of the infrastructure.

EPA funded application advisers will not:

- gather background information, although they can advise on where to access the necessary information (it is expected that the applicant will have already developed or have this ready)
- prepare a complete business case on behalf of the applicant
- prepare a complete grant application on behalf of the applicant.

The support is provided at the discretion of the EPA, and not all applicants will necessarily receive support. A decision by the EPA not to provide application support does not imply that the project is ineligible for funding. Conversely, receiving AAS assistance does not ensure application success.

If successful in applying for support, the EPA program manager will contact applicants to arrange a meeting time with the adviser. Advisers are bound to keep information provided by applicants confidential.

To apply to the Application Advisory Service, complete and submit the AAS application form (see Section 3 – More Information) by **5 pm 18 February 2022**. Applicants are encouraged to apply early to allow sufficient time for the EPA to assess eligibility and allocate hours.

2.10.10 The Triple Bottom Line

It is expected that your project will implement best practice and consideration of triple bottom line outcomes: Environmental, Economic and Social. This can be defined as being mindful of the 'big picture', for example, in designing, building, upgrading or enhancing a facility. Your application will need to demonstrate your commitment to incorporating sustainability principles into the design of your project. This includes energy and water efficiencies, biodiversity impacts and landscaping. The Government Resource Efficiency Policy (GREP) is a useful reference (see Section 3 – More Information). You should also include any associated actions your organisation has already implemented, or intends to implement, including reference to local or organisational strategies, policies or plans.

2.11 Assessment criteria

Selection for Trust grants is a merit-based process. Eligible applications will be assessed by an independent Technical Review Committee (TRC) against the assessment criteria set out in Table 2 below.

The TRC will assess and rank your application. All questions in the application form should be answered fully, within the specified section, and should be prepared with these criteria in mind.

Table 2 Assessment criteria

1. 20% The trial project will improve NSW circular economy outcomes by addressing critical gaps and barriers in the processing and use of waste plastics, paper/cardboard, or tyres	<ul style="list-style-type: none"> • The project has unique, innovative features and benefits that may result in improved or new products, services, processes, technologies or markets. • The project will lead to increased resource recovery rates and/or efficiencies for waste plastics, paper/cardboard and tyres compared to current or existing market practice, services and products. • The project aims to retain material/s at higher values/compositions (i.e. activities that sit higher on the waste hierarchy). • The trial addresses specific barriers to commercialisation in one of the following ways: <ul style="list-style-type: none"> ○ it tests the effectiveness or potential of innovative technologies and methodologies ○ it provides proof of performance of new products or activities ○ it generates evidence that will help new products or activities meet appropriate accreditation, standards or specifications.
2. 15% The process, technology or activity being trialled is well understood by the applicant and represents a suitable way to process, reuse or recover the target materials	<ul style="list-style-type: none"> • The proposed activities are a suitable and effective way of managing the target materials. • There is evidence that the proposed activities have been effective in similar applications and/or that sufficient research and development has already taken place to demonstrate that the project activities are feasible. This may include in local or overseas markets. Examples of evidence include case studies, research papers/results, written testimonials or contactable referees. • Quotes and feasibility designs are included for large/complex projects.

3. 15% If the trial is successful there is a high probability that the process, technology or activities trialled will be commercialised and become business-as-usual for the applicant, partner organisations and/or other industry bodies within New South Wales

- The applicant and/or project partners have a clear plan and an identified pathway to scale up/roll out the project upon successful completion of the trial.
 - Supply and demand for both the inputs and outputs are well understood.
 - Proposed prices and service offerings for future activities are credible and viable.
 - Evidence that applicants can secure adequate supply of raw materials and offtakes for the end products of a scaled-up project is not essential but will be viewed favourably.
-

4. 15% There is strong evidence that the project team and project partners can deliver the project to a high standard and on time

- The application demonstrates sound project planning and methodology.
 - Proposals must include a robust process for monitoring, evaluating and reporting on the success or failure of the project, including gathering supporting evidence and the assessment of any future activities enabled by the funded project.
 - The project team have demonstrated sound management skills, expertise and relevant experience.
 - Uncertainty, risks and barriers are identified, and appropriate mitigation strategies are proposed.
 - The applicant and partner organisations have proven satisfactory performance in any previous Waste Less, Recycle More, Environmental Trust, EPA or other grant projects, if applicable.
-

5. 15% The project demonstrates financial viability and represents good value for money for the NSW and Commonwealth governments

- The applicant has the financial means to complete the project and related administrative work by the required date. This could include support from project partners.
 - The potential impact of grant dollars invested is favourable compared to other applications submitted for the same material types.
 - Co-investment leveraged is favourable compared to other applications submitted for the same materials (i.e. such that return on investment of Commonwealth and NSW Government funding is maximised).
-

6. 10% The project will comply with relevant planning instruments, environment protection licensing and regulatory instruments

If relevant, the project/applicant:

- demonstrates compliance, or likely compliance of products within the Resource Recovery Exemption framework
 - is likely to obtain relevant licensing approvals
 - has proven performance and compliance history in relation to any existing licences held by the applicant
 - can demonstrate that the time required for all necessary planning, regulatory or other approvals has been considered.
-

7. 10% The project will have positive impacts for the NSW environment and community

The project can demonstrate:

- alignment with relevant sustainability policies and strategies, including the National Waste Policy Action Plan, NSW Circular Economy Policy Statement, Net Zero Plan NSW, NSW Plastics Action Plan and NSW Waste and Sustainable Materials Strategy 2041 (see Section 3 – More Information)
- environmental benefits (including non-market costs and benefits)
- social benefits, including potential job creation, and where relevant, that it addresses NSW's regional and remote waste challenges.

2.12 Application budget

2.12.1 Overview

The Application Budget form is an Excel document, additional to the main application form and can be downloaded from the Trust's website (see Section 3 – More Information).

When you complete the budget spreadsheet the figures you enter will be added-up automatically. Do not cut and paste data into the document as it will alter the formatting and cause errors, which may result in the submitted budget being deemed ineligible.

Enter the data manually and submit the completed form as an Excel document so that it can be uploaded directly into the Trust database. Please do not send a PDF version.

An incorrect or incomplete Application Budget form may render the application ineligible or reduce the Technical Review Committee's confidence in your capacity to deliver the project and manage the finances. If you are unclear about what is eligible and ineligible or how to complete the budget spreadsheet contact the EPA to discuss.

The Application Budget consists of one worksheet with three parts:

Part 1 Project expenditure breakdown

Part 2 Other sources of project income

Part 3 Summary of project budget for eligible grant items only

You must complete Parts 1 and 2. The 'total' fields will be added automatically in Part 3.

All items in your budget need to be detailed, reasonable and justifiable, especially where individual items comprise a large proportion of the overall budget. Detailed costing ensures that your budget is well planned and linked to the objectives and activities of your project. Ensure you can provide a corresponding invoice for all expenditure when you come to the reporting stage. Be specific and give unit values where possible.

2.12.2 Cash and in-kind contributions

The Trust values the ability of an applicant to secure additional cash and in-kind contributions that reflect support for a project and add value for money. These guidelines detail what is eligible and ineligible for funding.

Include all **eligible** costs for the project in Parts 1 and 2 of the Budget to a maximum of \$1,000,000 requested as a grant from the Trust. Please refer to Table 1 'What project activities can and cannot be funded' for guidance.

2.12.3 Taxation - goods and services tax (GST)

GST applies to payments made under this grant program. However, some grants of financial assistance may be subject to income tax in the hands of certain recipients. It is therefore recommended that you, as the applicant, seek independent legal and financial advice if uncertain about your organisation's taxation obligations.

Organisations administering a grant (and registered for GST) are not to include GST in the application budget figures. The Trust will add 10% GST to the grant payment.

Organisations administering a grant that are not registered for GST are to include in the application budget any GST that will be incurred during the life of the project.

A tax invoice is required for the Trust to pay each milestone payment of the grant. The invoice is to include GST if applicable. All NSW local and state government entities are GST exempt, and invoices should not include GST.

2.13 Application process

2.13.1 Timeline

The application process timeline for Stream 2 (Trials) is shown in Table 3 below. Please note, the closing date will not change, however, the assessment and announcement dates are indicative only and are subject to change.

Table 3 **Timeline**

Estimated time	Program activity
14 December 2021	Applications open
11 March 2022	Applications close
March 2022	Preliminary eligibility assessment of applications and contact applicants if further information is required
April 2022	An independent Technical Review Committee (TRC) reviews application and make recommendations to the Environmental Trust Board for funding
May/June 2022	Successful applicants are officially advised, and Deeds of Agreement sent

Applicants are required to submit the following documents:

Application Form	PDF Document
Application Budget	Excel Document
Cost Benefit and Financial Analysis	Excel Document
Supporting Documents	PDF, Word or Image Document

Note: The Application Form and Budget documents are locked. This means that the size of the text boxes will not expand, and the answer must fit into the space provided.

2.13.2 Checklist and document naming

Use the checklist at the end of the application form to make sure that your application is complete. You must adhere to these naming conventions for submitting the application documents:

- | | |
|---------------------------------------|--|
| • Application Form | 01 Grant Application |
| • Application Budget | 02 Grant Application Budget |
| • Cost Benefit and Financial Analysis | 04 Cost Benefit and Financial Analysis |
| • Supporting Documents | 05 Supporting Documents |

2.13.3 Supporting documents

Additional or supporting material submitted with your application should be kept to a minimum. Limit the number and size of attachments. Examples of acceptable attachments include:

- research paper or test results of technology or methodology proposed in the project
- case studies of same/similar technology or methodology in application
- feasibility design including flow or system diagrams
- detailed project plan
- written testimonials or letters of support from project partners/stakeholders/off-take markets
- CV's of key individuals involved with the program
- insurance and public liability certificate of currency
- quotes
- locational map
- evidence of consultation on Environment Protection Licence requirements if applicable
- evidence of consultation on planning development if applicable.

2.14 Who to contact for help?

For application assistance

NSW Environmental Trust

Phone: (02) 8837 6093

Email: waste.recycling@environmentaltrust.nsw.gov.au

For general program or project assistance or to discuss project ideas

NSW Environment Protection Authority

Phone: (02) 9995 6179, (02) 9995 6920 or (02) 9995 5596

Email: infrastructure.grants@epa.nsw.gov.au

Late or incomplete applications will not be accepted.

2.15 Assessment and notification

2.15.1 Acknowledgement of receipt of applications

You should expect acknowledgement of your application form within 2 days of the closing date. If you do not receive an acknowledgement email, contact the Trust to ensure your application has been received.

You should expect to receive a confirmation email with a unique reference number within 3 weeks of the closing date. This reference number should be used in all correspondence to and from the Trust. If you do not receive an email within 3 weeks, contact the Trust Administration at waste.recycling@environmentaltrust.nsw.gov.au.

2.15.2 Assessment and approval process

After the closing date, Trust Administration staff will check whether your application is eligible and complete.

The Trust establishes an independent Technical Review Committee (TRC) for each grant program. Each TRC is made up of people with knowledge and experience relevant to the particular grant program and includes at least one community groups representative and at least one industry representative.

TRC members agree to undertake their duties within the principles of ethical conduct, integrity, objectivity and independence. They are also required to keep all matters concerning applications confidential and to declare any potential conflict of interest.

The TRC will assess the merit of your application against the assessment criteria outlined in these guidelines. The assessment process is overseen by an independent probity auditor. The TRC then makes recommendations to the Environmental Trust Board who will make final funding decisions. Successful applicants may not receive the full amount requested, and funding offers may be subject to special, as well as general, conditions of funding.

Unsuccessful applicants can request feedback on their applications by emailing Trust Administration at waste.recycling@environmentaltrust.nsw.gov.au.

Decisions by the Trust are final. There is no appeal process.

2.15.3 Notification of grant decisions

The Minister for Energy and Environment, as Chair of the Environmental Trust, may publicly announce the successful applications. Applicants will also be notified in writing.

2.15.4 Conflict of interest

Applicants are required to declare any real, potential or perceived conflict of interest (COI) that they may be aware of in relation to the application for or awarding of a grant, particularly where:

- the project for which funds are being sought is to be undertaken on private land where that land is owned by a member or members (or relatives) of the organisation applying for a grant
- procurement of equipment or services is from a related entity
- members, relatives of members, or related organisations/companies of the applicant organisation are/will be paid with Trust funds
- members, relatives of members, or related organisations/companies of the staff of the applicant organisation are/will be paid as contractors/consultants with Trust funds
- works carried out by the project could create current or future financial or other benefit for members of the organisation applying for the grant, or their relatives
- third parties used to assist in the preparation of the grant application will potentially be engaged to carry out work on the project.

Such circumstances do not exclude the project from being funded, however, they must be acknowledged as a potential conflict of interest. The Technical Review Committee will assess each situation on its merits.

2.15.5 Confidentiality

The information you supply will be used to assess your application. The Trust may share this information with the EPA and/or the Australian Government as program partners. Information on funded projects may be used for promotional purposes. Information that you provide to us may be shared with other NSW Government and Australian Government agencies and consultants on a confidential basis to better understand the status of the relevant waste markets or infrastructure.

Otherwise, subject to legal requirements of disclosure, we will treat your application confidentially. We will endeavour to treat sensitive personal and confidential information that you provide to us confidentially. If you require strict commercial confidentiality, you should request this in your application. However, all documents held by the Trust are subject to the *Government Information (Public Access) Act 2009*.

2.15.6 Intellectual property

The applicant must own, or be able to, lawfully use any intellectual property required to carry out the project. The applicant will be required to give the Australian Government, Trust and EPA (without cost) a non-exclusive irrevocable licence to use, reproduce, communicate to the public, or adapt the intellectual property in the project.

2.15.7 What happens if false or misleading information is supplied for this application?

Applicants must certify that all the information in the application is true and correct. The **grant will be revoked and funds, plus interest, must be repaid** if:

- the Grantee at any time provides misleading or false information
- there has been a material change in the circumstances of the Grantee's financial position, structure or identity, including:
 - being a company, resolves to go into liquidation
 - being a non-profit company, ceases to retain its non-profit status
 - being an organisation, ceases to operate.

An assessment regarding possible fraud will also be undertaken and appropriate legal action initiated if warranted.

Please be aware that the Trust or EPA may conduct financial and other background checks on applicant organisations, project partners and personnel before awarding funding.

2.15.8 Probity

The Trust places high importance on the integrity and transparency of program and project governance. It is vital that all funded projects are delivered in accordance with legal and regulatory requirements, as well as other accepted governance and project management standards. Value for money in project delivery is also a significant priority for the Trust.

2.15.9 Procurement

To conform to relevant governance and probity standards, the Trust requires all grantees to follow NSW Government procurement procedures (see Section 3 – More Information). This relates to all major budget items, such as the purchase of materials or the engagement of contractors or consultants.

All contractors and consultants must be chosen on their merits and ability to effectively deliver the work.

Grantees must select contractors or consultants via a competitive process. This may be subject to audit by the Trust, and so all procurement documentation should be retained by the grantee.

For any contract over \$30,000, you must secure a minimum of 3 written tenders/quotations. Also, unless selected through an open competitive process, the value of work to any single contractor or consultant must not exceed \$30,000 in total over the life of the funded project.

If an applicant uses the services of a contractor or consultant to assist in the development of an application, that contractor or consultant is excluded from tendering or quoting for work on the successful project, as they would have an unfair advantage.

For projects that involve related party transactions, applicants who are purchasing goods or services from related entities will not be eligible for funding unless they can prove to the satisfaction of the Trust that any financial benefit is given on terms that would be reasonable in circumstances where the parties are dealing at arms-length or on terms that are less favourable to the related party.

While these types of transactions are legal and ethical, the relationship inherent between the involved parties creates potential conflicts of interest, and the Trust would prefer not to have to manage these potential conflicts. If in doubt, contact Trust Administration before submitting your application.

The conditions of tendering shall be the same for each tenderer on any particular tender process, and all tenders must comply with the NSW Government Code of Practice for Procurement (2005) (see Section 3 – More Information).

2.16 Obligations of successful applicants

2.16.1 Grant conditions

If your grant application is successful, you will be required to abide by the conditions contained in our Deed. If you are not willing/able to agree to these conditions, you should not submit an application. Please contact the Trust for an example copy of the Deed.

2.16.2 Deed of Agreement (Deed)

Successful applicants will be required to sign a performance-based Deed with the Trust, which will stipulate all funding obligations and conditions. The Trust will closely monitor adherence to all requirements of the Deed, as well as progress against project deliverables and expenditure of funds. Funding is paid after completion of agreed milestones and continued funding is dependent upon the Trust's acceptance of milestone reports.

Successful applicants will have up to 30 days from the date of formal notification of the offer of funding to sign the Deed. If the Deed is not signed within the specified period, the offer of funding may lapse.

Successful applicants will be required to comply with all conditions (including special conditions) contained in the Deed, including, but not limited to:

- accept the grant funding is contingent on improved quality and consistency of product and may be adjusted according to any variances to the agreed outcome
- provide written evidence from project partners who are contributing funds or resources to the project
- confirm a final schedule of payment and reporting dates relative to all project activities
- complete a Project Measures report at time of project commencement (projected numbers) and with each milestone report (actual numbers achieved). Templates are available on the Trust website detailing what type of information will be required
- provide milestone and final reports in accordance with the reporting requirements outlined in the Deed, including an independently certified Final Statement of Expenditure
- provide all project related invoices to the Trust, including evidence of in-kind expenditure
- provide a Tax Invoice to the Trust for each grant instalment
- submit to the Trust, in writing, any request for a variation to the agreed project plan, project measures, timeframe or budget
- not proceed with requested variation unless/until formal approval received from the Trust
- acknowledge the Australian and NSW Governments in all promotional material and public statements about your project. Your acknowledgement must include the appropriate Australian and NSW Government logos in accordance with publishing requirements. Logo and requirements for use should be downloaded from the Trust website (see Section 3 – More Information)
- agree for all knowledge gained as part of the grant to be made publicly available, whether that be publishing the final report or promoting the project via other avenues available to the Australian Government, the Trust and the EPA
- invite Australian Government, Trust and EPA representatives to any launch or public event associated with this funding, and where they can attend, they are acknowledged as official guests and provided with the opportunity to publicly address the event.

2.16.3 Project implementation timeframe

There is limited capacity to carry over unspent program funds to future financial years. Consequently, projects should aim to be completed by **30 June 2024**.

- For projects that are not completed by **30 June 2024**, a formal variation must be submitted to the Trust justifying why the grant should not be terminated. Requests for variations to projects must be submitted in writing to the Trust as soon as possible. Extensions of time will only be approved under exceptional circumstances.

Successful applicants will be required to:

- demonstrate commencement within 4 months of signing the Deed, which includes obtaining all approvals, advertising tenders or commencement of works. If a project is not commenced within this 4-month period and without justification and Trust approval the grant may be revoked.

2.17 Key terms

Table 4 Interpretation of key terms

Term	Description
Breach	<p>An act of breaking or failing to observe a law, agreement, code of conduct, regulatory measure, standard or compliance requirement regulated by the EPA, having a reportable incident or receiving a penalty, notice, prosecution or regulatory intervention that has occurred in the past 5 years.</p> <p>A breach will not impact the funding application if:</p> <ul style="list-style-type: none"> • the breach was not serious • the breach has been satisfactorily resolved • the applicant has made appropriate efforts, including implementing management systems, to ensure the breach is not repeated • since the breach, the applicant has had a satisfactory level of compliance with environmental legislation.
Environment Protection Authority (EPA) waste hierarchy	<p>The waste hierarchy is a set of priorities for the most efficient use of resources, drawn from the objectives of the <i>Waste Avoidance and Resource Recovery Act 2001</i>.</p> 

Term	Description
In-kind activities	<p>Contributions to a project that are not financial. Examples of in-kind contributions include:</p> <ul style="list-style-type: none"> • staff time to manage project implementation, including volunteer labour (calculated at \$50/hour for instance) • installation costs that use existing internal resources • use of equipment or machinery that is already owned by the funding recipient (provided at no cost).
Materials recovery facility (MRF)	<p>A facility that handles a range of recyclables that have usually already been separated from other waste streams (e.g. by householders or businesses before the collection stage).</p> <p>At the MRF, the materials are sorted into individual material streams before being sent for recycling. Components of the incoming material that are not suitable for recycling will be separated as 'contaminants' at the MRF.</p>
Recycling	<p>Activities in which solid wastes are collected, sorted, processed, and converted into raw materials to be used in the production of new products.</p>
Re-processors	<p>Use industrial processes to change the physical structure and properties of discarded materials so they can be used again by the community. Re-processors are diverse in nature and range from facilities that dismantle and break down products (e.g. tyres, e-waste and mattresses) into their different components to provide feedstock for further reprocessing through to facilities that melt, break up and reform materials (e.g. organics, plastics, glass and rubber) to either make feedstocks for new products or reuse materials.</p>
Resource recovery	<p>The sum of materials sent to recycling net of contaminants and residual wastes sent to disposal.</p>
Trial	<p>Projects that test the feasibility of innovative technologies and methodologies to increase recycling or reuse of Waste Export Ban Materials.</p>
Waste export ban material	<p>Materials subject to the Council of Australian Governments (COAG) waste export ban. The decision was taken on 13 March 2020 by COAG to phase out the export of waste plastic, paper, glass and tyres. These include liquid paperboard but exclude textiles.</p> <p>For a full description of the materials covered by the COAG Waste Export Ban visit the Department of Agriculture, Water and Environment website.</p>
