

S00148 – Eric Tedesco

In reference to the current wildlife licensing review.

I am a current member of both the Pet Industry Association of Australia and the Aquarium Industry Association of Australia.

I would like to advise that PIAA have not been inclusive or consultative with their members or the greater industry in formulating their position on behalf of industry. It appears their representation to date has been based on protecting the commercial interests of current commercial license holders.

I would like to fully endorse the position and recommendations made by the Aquarium Industry Association as representative of my business. Their position has been developed in consultation with the entire membership and other industry stakeholders.
