

S00070 – Ian Robinson

include a mechanism to add injured / sick rescued wildlife to the keepers' log book especially while it's in care and rehabilitating.

And if the animal is too disabled to survive release back to wild there needs to a mechanism to add it permanent to keepers' record book - surely its more humane to keep a rescue as a pet for the remainder of it's life than to release it if is unable to fend for itself or defend itself.
