

S00043 – Jenny Lucas

I am hoping that more mammals can be added to the Native Mammals Keepers list. The people who own the 2 species already listed are very responsible keepers. More mammals are kept in Victoria & overseas which doesn't make any sense as to why those in NSW can't. Our native mammals are already endangered due to feral cats, etc. Keeping more than the already 2 species would increase the knowledge & populations of them due to declining numbers out in the wild.
