

S00079 – Kurt Tillett

My only few comments are as follows:

Having a code of practise ensuring all species labelled with 'Code' on the proposed species list are monitored by the owner and the wellbeing of the animal isn't at risk of backyard over breeding programs.

I think increasing the threatened species to a level 2 license is an excellent idea.

Having an option to comment and request new species codes in the case of hybrid birds and reptiles on the animal keepers that aren't listed.

Also having a mobile app to possibly look up breeders to ensure they contain a license and not just giving false information.
