

S00016 – Lachlan and Julia King

Carrying on from my last submission, I forgot to mention a few native mammals we should be able to have under appropriate licensing. Other states, and even other countries, can keep native Aussie mammals as pets, yet here in NSW we can't. Keeping native species of mammal as pets would be beneficial to not only the keeper and public education, but also to the species. We should be able to keep echidnas, phascogales, dunnarts, bandicoots, quolls, possums, Pygmy possums, sugar gliders, feathertail gliders, Mitchell's hopping mice, pademelons, quokka and certain species of wallabies and kangaroos
