

S00017 – Michael Clarke

I like the new wildlife licencing structure. The only areas I would like to have changed. Is the following.

1) wildlife rescue groups if they have animals that can not be released but can still be used for breeding our education should be given to wildlife parks our the public who have a licencr to keep wildlife.

2) I would like to see more native mammals on the list that can be kept as pets. Similar to the South Australia list. The sugar and squrial glider, the quoals. Wombats and so on would be great to put on the list that can be kept on the Mammals that can be kept as pets to protect the future.

3) I would like to see birds of prey on the list that can be kept as pets and be able to use them for vermian control
