

S00164 – Peter Schwartz

It is time for Wildlife licensing reform in regards to Eastern Grey Kangaroos in SE New South Wales.

As a farmer, for the last 18 years, I continually, very year, apply for a license to harm Eastern Grey Kangaroos that are in plague portions in the area. Generally in apply to kill, say, 400 and I am issued 100. Why this is I will never know.

Do away with the tags, and let farmers control Eastern Grey Kangaroos on their farms. Here on the South Coast in the Eurobodalla Shire, Kangaroos profit farming activity and are are safety hazard on the road.

Change in needed.
