

S00128 – Prisilla Schryver

There should be no need for a licence to "harm" kangaroos. The current situation has created a plague of kangaroos that cannot be sustained. Management of the Kangaroos should be left up to the landholder and not be controlled by bureaucrats.

The NSW Government should seek comment from Licensees and give them more time to comment on changes, I received the letter about changes on 20/7/18 for a closing date of 24/7/18. Perhaps the comments are not even truly sought or will even be considered .
