

S00023 – Terry Hile

The plan seems to make it easier to exploit and destroy our native flora and fauna for financial gain, when we need to be enforcing and increasing the protections for our native flora and fauna.

All the levels of Government in Australia appear to be avoiding law enforcement or reducing legal protection at every turn (especially Environmental Laws) and the reason seems to be financial savings for Federal, State and Local government Budgets!!

I do not want to see any changes to the current Wildlife Licensing that make it easier to exploit and destroy our native flora and fauna and strongly oppose the draft plan.
