Dear Dr Daley

**Request for additional information: CP17-001, CP17-002, CP17-003, CP17-004**

The Department of Industry - Lands wishes to request additional information under Part 6, Division 3 of the *Environmental Planning and Assessment Regulation 2000*, regarding development applications CP17-001, CP17-002, CP17-003 and CP17-004.

The proposed works, as described in the subject development applications, are referred to as 'repairs' to existing rock walls. The information provided only addresses the impact of the 'repairs', and not the whole of the existing rock walls, as proposed to be modified.

However, the existing rock walls have not been approved under the *Roads Act 1993*. Therefore, further information is required so that the assessment of the approval under the *Roads Act 1993* can properly consider the cumulative impact of the whole of the proposed structures.

Additional information is requested that addresses the cumulative impact of the structures, as proposed to be modified, in relation to section 5 of the *Roads Act 1993* and the 'right of passage' by members of the public along The Esplanade, and section 6 of the *Roads Act 1993* and the 'right of access' to The Esplanade by owners of adjoining land.

Yours sincerely

Brendan Logan  
**Manager Coastal Management Unit**
