Contact: Marc Daley, (02) 4927 3103

Dear Mr Watson,

Thank you for the additional information you have provided in response to our letter dated 4 April 2017 on Development Application CP17-002. We confirm receipt of this information on 13 April 2017.

We again note that information in respect of a number of matters still remain outstanding. As advised in our previous letter, provision of this information in considered necessary to assist the Coastal Panel in exercising its functions as a consent authority.

In relation to a number of the Coastal Panel's information requests, we note your response referencing the 2013 WRL report. In consideration of this material, the Coastal Panel notes the ICM proposed design is a different structure to those works exhibited in the WRL report.

The Coastal Panel also notes the proposed works represents a substantial increase over and above what is currently in-situ, as evidenced by the intent to import rock to site to give effect to the proposed design. The Panel requires an assessment on the impact that the proposed works will have on and from the physical coastal processes and hazards. It is noted that this information still remains outstanding.

The NSW Coastal Panel is giving you a further opportunity to provide this outstanding information. We request that you provide the additional information, or details of when you will be able to provide that information, within 10 days of this letter. If this information is not provided by this date, the Panel will then proceed to determine the application on the basis of the information currently before it.

Should you wish to discuss any of the information in this letter please contact coastal.panel@environment.nsw.gov.au

Yours sincerely

MARC DALEY
Secretariat
NSW Coastal Panel
