

Please withhold my name from the register.

I do not have a lot of experience understanding the SEPP's for Planning Legislation.

After reading this document I have no faith that this process is transparent and will protect our coastal areas.

I have objections to that land being used for oil or mining rights or developed in any way.

I would like to know if there will be any permanent changes to the protection of all submerged lands which would allow government departments to sell it off for oil or mining rights.

I would also object to any changes to the protection of lakes and rivers, estuaries, lagoons, coastal waterways and submerged lands, headlands and rock platforms.

I believe that within 100m perimeter area of littoral rainforest - residential zoned blocks should not be able to impact on Littoral Rainforest through erection of a building, earthworks, destroying or removing native vegetation.

For vulnerable Coastal areas - What guidelines are you proposing?

I request for an extension on the community consultation process with this report and wider public coverage.
