·lead flashing

·chimney tray

RIDGE PATTERN

Notes

Chimney trays formed and folded from 1.0mm (20 gge.) galvanized steel flat sheet.

All upturns, downturns to be 50mm.

All joints to be securely welded and rust protected

Flue pargetting should taper to form a drain onto tray.

Lead flashings should be placed so as to allow water to escape from tray

TRAVERSE PATTERN

LONGITUDINAL PATTERN
