Final Determination

Minor amendments to the lists of threatened species and ecological communities in the Schedules of the *Biodiversity Conservation Act 2016*

The Threatened Species Scientific Committee, established under the *Biodiversity Conservation Act 2016* (the Act), has made a final determination to amend the list of species and ecological communities in Schedules 1, 2 and 3 of the Act referred to in paragraphs (a) and (b) below. Minor amendments to the Schedules are provided for by section 4.19 of Part 4 of the Act.

a) The Threatened Species Scientific Committee is of the opinion that the following amendments are necessary or desirable to reflect a change in the name of a listed species or a reclassification of a listed species into further species as a result of taxonomic revision:

The references cited contain the reasons for these amendments in the Schedules.
