Purpose of this tool

This koala rehabilitation assessment tool has been designed to help wildlife rehabilitation groups monitor their level of compliance with the *Code of practice for injured, sick and orphaned koalas* (the code). Its primary purpose is to proactively help inform and guide improvements to their standards of koala care and optimise postrehabilitation outcomes.

The tool is for use by assessors to record observations during a site visit. Assessors may be, for example, species coordinators or experienced koala rehabilitators such as mentors. The assessment aims to provide an objective snapshot of a group member's application of the code. When applied across multiple members, the tool can also strategically inform future training and guide grant applications for replacement enclosures or other assets which are not code compliant.

Everyone authorised to interact with koalas is required to act in accordance with the code. It has been developed to protect the welfare of rescued koalas and support the conservation of wild koala populations. Compliance with the code is a condition of a biodiversity conservation licence to conduct wildlife rehabilitation under the *Biodiversity Conservation Act 2016*. The person applying the tool must be familiar with the content and application of the code.

Wildlife rehabilitation groups are encouraged to maintain a register of volunteers who have been assessed under this tool so in future they can be compared against previous assessments.

How to use this assessment tool

The tool has 5 sections:

- 1. Training
- 2. Records management
- 3. Facility inspection
- 4. Field observation of animal rescue and transport
- 5. Assessment summary.

An inspection may target one or more sections of the tool. Sections 1 to 4 align with specific standards in the code. It is preferable to complete Sections 1, 2 and 3 together or Sections 1 and 4. Section 5 summarises the assessment results from each section.

Contents of each section

- A place to record the assessor's and group member's name, signature and date of inspection.
- Code standards to be assessed.
- An overall assessment question and prompts to help guide the assessment.
- Targeted questions which align with specific standards in the code.
- Check boxes to record responses to the questions.
- Space to score and tally the results of the assessment.
- Space for notes about any observations you make during the inspection and to make specific recommendations.

Planning and what to take to the assessment

Before the site visit

- Contact the group member and arrange a mutually convenient time.
- Consider if an observer should also attend with the assessor.
- Explain the purpose of the assessment to the person who will be assessed before the site visit (and again at the start of the site visit).
- Ask if there are koalas on site and at what stage of rehabilitation.
- Identify which standards you intend to assess.
- Pack a copy of the koala code of practice.
- Be familiar with the data reporting template.
- Bring a mobile phone and ask if you can take photos.
- Bring a tape measure, pen and clipboard or laptop.

Scoring each section and collating the results

Each question requires the assessor to select the appropriate answer, as shown in the example below. Only one answer can be selected. The answers can then be collated, scored and converted to a percentage. This sample exercise has 5 target questions:

Example asse	Example assessment (Records management assessment 5)			
Code of practice standards: 12 Record keeping, 6 Care procedures Records management assessment 5: Were records on monitoring kept in accordance with the standards? Prompts: Check the monitoring section in the record sheet. Be familiar with the 'care procedures and record keeping' standards in the code.				
Target questi	ons. Select one respo	nse for each question:	:	
	koalas are monitored on, scat quantity, urin			ion levels, leaf
🗆 All	🛛 More than 50%	\Box Less than 50%	□ None	□ N/A
2. How many	koalas in intensive ca	re are monitored for s	tress and pain?	
🗆 All	\Box More than 50%	\Box Less than 50%	🛛 None	□ N/A
3. How many koalas in intensive care are weighed at least once a week?				
🖾 All	\Box More than 50%	\Box Less than 50%	□ None	□ N/A
4. How many	orphaned dependent	koala joeys are weigh	ed at least twice	e per week?
🗆 All	\Box More than 50%	\Box Less than 50%	□ None	🖾 N/A
5. How many least once	independent juvenile a week?	koalas or koalas in int	ermediate care	are weighed at
🖾 All	\Box More than 50%	\Box Less than 50%	□ None	□ N/A
How to calcu	late an assessment sc	ore		
Step 1: Tally t	he selected response	s for each column		
2/5	1/5	0/5	1/5	1/5
Step 2: Subtract the number of not applicable (N/A) answers from the total number of questions. In this example 5 questions – $1 \text{ N/A} = 4$. Give the score for each column as a fraction.				
2/4	1/4	0	1/4	-
Step 3: Conve	ert the fraction to a pe	rcentage (%)		
50%	25%	0	25%	-

In this example, 2 of the 5 questions were scored as 'All', 1 question as 'More than 50%', 1 question as 'None' and 1 question as 'N/A'. The question about orphaned koala joeys did not apply in this example because there wasn't one on site, so only 4 questions apply to this assessment. The total assessment score is therefore 2/4 (50%) for 'All', 1/4 (25%) for 'More than 50%', and 1/4 (25%) for 'None'. The score or percentage for responses 'All' (or 'Yes') is then recorded in the assessment summary (section 5).

Section 1: Training

The purpose of this section is to assess the currency of training. This should be done before other sections of the assessment and verified with the group member.

Member name:	Signature:	Date:
Assessor name:	Signature:	Date:

Section 1: Training

Code of practice standards: 11 Training

Training assessment: Is the member trained to rescue and/or rehabilitate koalas?

Prompts: Check the member's details and group training register before the inspection. Confirm what tasks the member does with koalas and what training they require.

Target questions. Select one response for each question:

1. Is the member authorised to work with koalas? . Yes No 2. Has the member completed the required training for the tasks they perform? . Yes No 3. Is the member's training current? . Yes No Tally responses for each column and display the score as a fraction out of 3 Convert to a percentage (%)

. .

Notes:

Section 2: Records management

The purpose of this section is to assess the group member's koala records, including decisions made about the fate of animals in care. It may help to review the previous year's records before starting the assessment.

Member name:	Signature:	Date:
Assessor name:	Signature:	Date:

Convert to a percentage (%)		

Notes:

Record 'N/A' here if no koalas are ready for release.

Section 4: Field observation

This section is a practical assessment of the application of the rescue, transport and release standards in the code. It is best conducted in the field through observation, although parts such as personal protective equipment (PPE), rescue equipment and release considerations may be completed as part of the facility inspection and record management sections.

Recommendations:

Section 4c: Transport

Code of practice standards: 4 Transport

Transport assessment: Was the koala transported in accordance with the standards? **Prompts:** Observe the method and conduct of the koala's physical transport.

Target questions. Select one response for each question:

1.	Was the transport	container appro	priate for the s	size and condition	of the koala?
----	-------------------	-----------------	------------------	--------------------	---------------

□ Yes □ No

2. Was the koala positioned so its breathing is not restricted?

🗆 Yes 🛛 🗆 No

3. Was the transport container placed in the correct position in the vehicle?

□ Yes □ No

4.	Was the	transport	container	covered	with a	breathab	le cloth?
----	---------	-----------	-----------	---------	--------	----------	-----------

🗆 Yes 🛛 🗆 No

Section 4c: Transport

5. Is the transport container escape-proof and designed, set-up and secured to prevent injuries to the koala?			
□ Yes	□ No		
6. Was the ko (See Stand	-	emperature appropriate to the age and condition?	
□ Yes	□ No		
If the rescue i	s not a sub-adult or ad	lult koala, record N/A for questions 7 and 8.	
	adult or adult koala, do o hold on to?	pes the transport container contain something for	
□ Yes	□ No	□ N/A	
8. For a sub-a	adult and adult koala,	does the transport container have a soft substrate?	
□ Yes	□ No	□ N/A	
If the koala re	scued does not have a	suspected fracture, record N/A for question 9.	
9. For koalas	with a suspected frac	ture, spinal or pelvic injury, is there extra padding?	
□ Yes	□ No	□ N/A	
Tally respons the total)	es for each column an	nd display the score as a fraction (deduct N/As from	
Convert to a p	percentage (%)		
Notes:			

Section 5: Assessment summary

There is no pass or fail associated with this assessment. Its purpose is to identify those standards where compliance with the code can be improved. Specific recommendations for improvement can be recorded below. A time frame should be discussed and agreed with the group member to implement any recommendations.

Summarise the outcome of the assessment in the table below:

- Circle 'Yes' in the left-hand column for each section assessed.
- Record the total score as a fraction (i.e. X/Y) for answers with 'All' or 'Yes'.
- Record the percentage score (%) for answers with 'All' or 'Yes'.

Assessed	Section	Score (fraction) All/Yes	Percentage (%) All/Yes
Sections 1 a	nd 2: Training and records management		
Yes	1 Training		
Yes	2 Records management (assessment 1)		
Yes	2 Records management (assessment 2)		
Yes	2 Records management (assessment 3)		
Yes	2 Records management (assessment 4)		
Yes	2 Records management (assessment 5)		
Section 3: F	acility inspection		
Yes	3a Housing and rehabilitation – general care		
Yes	3b Housing and rehabilitation – intensive care (assessment 1)		
Yes	3b Housing and rehabilitation – intensive care (assessment 2)		
Yes	3c Housing and rehabilitation – intermediate care		
Yes	3d Housing and rehabilitation – pre-release housing		
Yes	3e Pre-release assessment		

Assessed	Section	Score (fraction) All/Yes	Percentage (%) All/Yes
Section 4: F	ield observation		
Yes	4a Rescue (assessment 1)		
Yes	4b Rescue (assessment 2)		
Yes	4c Transport
