The diagram illustrates a cross-section of a road profile. The horizontal axis represents the road's length, and the vertical axis represents elevation. The profile shows a road with a design surface and an existing surface. The design surface is a straight line with a constant grade of 6.8%. The existing surface is shown as a dashed line, indicating a lower elevation than the design surface. The road is flanked by property boundaries (PROP BDY) on both sides. The centerline of the road is marked with a dashed line and labeled 'MCB0'. The road is divided into two lanes, each 12 feet wide, with a 4-foot shoulder on each side. The total width of the road is 32 feet. The road is shown with a 6.8% grade, which is indicated by a slope triangle with a vertical rise of 6.8 units for every 100 units of horizontal run. The road is shown with a 6.8% grade, which is indicated by a slope triangle with a vertical rise of 6.8 units for every 100 units of horizontal run. The road is shown with a 6.8% grade, which is indicated by a slope triangle with a vertical rise of 6.8 units for every 100 units of horizontal run.
